Zubin Raja

M. Sc. (IT) - 2010
zubin.m.raja@gmail.com

Founder: Design The Dots

Brief Profile

Mr Zubin Raja is the founder of Design The Dots. After years of exposure to outsourcing in software, website and mobile application development, team Design. They have decided to step ahead to use their expertise in technologies to architect their own products to provide creative solutions.

They grew up in the era of technology evolving and growing with smartphones. As said, Necessity is the mother of invention. Intuition during many experiences gave feeling to have such products that could solve problems and make life easy. Intuition became a habit to identify real-world problems and experience started connecting well with the right technologies to build robust solutions. This is why they chose to design the dots that don't exist to connect them well with real world.

Kirtikumar Avaiya

M. Sc. (ICT) - 2012
avaiyakirtib@gmail.com

Founder: PSK Technology

Brief Profile

PSK TECHNOLOGY
DESERVE QUALITY PRODUCT

Mr. Kirtikumar Avaiya is the founder of PSK Technology. PSK Technology is an Offshore Outsourcing Services company that commits to what it can deliver. Over a period of time have realized that outsourcing is just not about having good development capabilities but also making the right delivery commitments aligned with clients' goals. They have invested a lot of energy in creating amazing delivery processes, seamless communication methodologies and flexible business models to build a company from the perspective of the client. At PSK Technology, they have been in the thick n thin of the IT outsourcing business and understand very well all possible nuances of this industry. They know very well how projects fail to go to market and die an early death on some developer's PC. Therefore they have very carefully crafted their delivery models to ensure they minimize your risk of outsourcing. Their Company is constantly growing and changing. Thanks to their core values, they're able to focus, adapt and flourish.

They treat others as they want to be treated. They care for each other, their customers and their community.

Build a trusted business relationship with you

Understand and quickly resolve your challenges

Minimize your IT Risks by giving you best-in-class, reliable services

Deliver high-quality yet cost-effective IT solutions

Guarantee 100% customer satisfaction & value for money

Hinal Prajapati

B. Sc. (IT) - 2003
hinal@lintelindia.com

Founder: Lintel Technologies Pvt Ltd

Brief Profile

LINTEL

Mr Hinal Prajapati is a CEO at Lintel Technologies Pvt Ltd. Technology becomes generic when passion, motivation and imagination are not invested in its deployment. Lintel transforms the generic into an interesting human narrative by making these three elements into their process and methodology. This ensures that the adoption of their technology solutions happens in a way that embraces cultural specificities, individual context and local sensibilities.

Customers work with them not just to fulfil their requirements or to optimize their cost, time or resource utilization. They are sought out more for their commitment to the above values. These values are not an abstract corporate credo for them instead, they represent their pragmatic approach and everyday practice in solving customer problems. When the words passion, motivation and imagination represent their pragmatic approach to working with people and communities.

They invite you to desire and demand the seemingly impossible and relish the reward. Their corporate culture is constantly evolving because they are not easily satisfied and they tirelessly question the limits they place on their beliefs and convictions. If there is a better way to implement a better solution, they can be sure that either they find it or at least be interested in zealously pursuing it.

The capacity to innovate is not equal at all developmental stages of an organization. This capacity is optimal when a good team is in place to constantly push the boundaries and has enough experience to not avoid both simplistic solutions and expensive mistakes. They believe that they at Lintel are at this stage now and they would like to partner with you to leverage their desire to make a difference. Technology includes Mobile, Web, Telephony, Desktop, and Cloud-based services.

Forum Marfatia

M. Sc. (IT) - 2013

hello@forummarfatia.com

Founder: Online Yug

Brief Profile

Ms Forum Marfatia is the founder of forummarfatia.com. At the very beginning of her career, she was working in the IT industry that's exactly when the seeds of Digital Marketing were sown in her heart and that's also when her dream became a little bit more specific- to start her own Digital Marketing Training & Consulting services.

She diligently observed how Google, Facebook and all other social media platforms targeted potential buyers using relevant data and realized how different businesses can be expanded exponentially with the proper application of Digital & Social Media Marketing.

The fact that there were no reliable institutes or certification courses offering "Digital Marketing" training in Surat turned out to be both a serious challenge and a blooming opportunity for them.

A dream of digitising thousands of people is being achieved and also continuing to grow even more. She feels proud & happy to have 10,000+ people of Surat, Valsad & Vapi digitised within the span of 3.5 years.
