PREAMBLE

LOCF in Defence and Strategic Studies is intended to provide a broad framework within which the discipline could respond to the changing needs of its various stakeholders in exclusivity in a more romanticized manner.

The template is an initiative of new kind and is expected to assist in the building and maintenance of under graduate Programme in Defence and Strategic Studies with innovative skill by holding a periodic review within a broad framework of an agreed structure as standard reference.

It is pertinent to mention that Defence & Strategic studies as a separate discipline is still underway to its final accomplishment vis a vis other established subjects/disciplines. This is notwithstanding, the other variants in which the discipline have not even acquired the status of a full degree programme, rather rests as part of or one of the elective subjects in the faculty of Arts, Humanities and Sciences.

There is strong plea to have a Bachelor's degree programme in Defence and Strategic Studies to brand it more sovereign in outlook.

Incredible, while security is a buzz word penetrating all pervasively at the, national and global level, the significance of this subject remains almost an amiss in country's scenario.

LOCF however, is a great strategic enterprise to this effect to build an architecture in not only reviewing the existing course curricula, but also endeavor to create a roadmap for its variants verticals - be the institutions serving the discipline; the faculty, the students or the societal environment providing a desired turf for a more meaningful dispensation in the long run.

A thought process has been generated to set and raise the standards in the subject shoving it at par with other academic programmes. For instance, a misperception gets created that the subject lacks employability avenues. Whereas given to its potential it has high value job creation credentials. But the general apathy in awareness and understanding towards security issues at institutional levels has been of great hindrance in the growth of this subject.

The LOCF provides a platform to look into certain progenial issues through obligatory sanctity attached to the development of this academic program which could best be cultivated.

There is a dire need to look holistically towards the subject to make it more attractive and relevant meaningfully. However, the question that does Defence Studies as an under graduate programme be put on ascending mode or the existing profile of the subject be strengthened to make it more marketably profitable for further inducement?

Defence and Strategic Studies as a subject demands specialized audience which currently dwells more on free for all. In the coming time, when specialization at micro level is the need of art, the subject too demands a favorable consideration and attention to contribute to the national potential. The thrust line is interest and passion which can extrapolate into various manifestations. It may be interesting to pen down the views of one of the student who said 'the subject gave me an opportunity to grow not only in many ways but each day also; grooming me to imbibe can do attitude'.

However, there is great need to showcase the subject in its own turf due to its multi - disciplinary spread into arts, science, management, sports, leadership strategy and defining of political behavior.

LOCF provides an opportunity to examine such various dimensions.

1. Introduction

LOCF indeed is a great initiative by the UGC to introduce improvement of quality in higher education.

1.1 The under graduate programme being a first dispensation in higher education is critical to the extent that it not only reserves certain transformation of mind from schoolite to a wider influence, but also at times repress or retard his/her thought process for the lack of desired input from authorities, peers or absence of common information loop. For instance, how much is known that IIT's, the premier institutions in India also run law faculty or LLM courses.

1.2 Taking recourse to the discipline of Defence and Strategic Studies there has been a general apathy towards the subject both at federal and state level despite certain recognizable traits attached to its significance. Like Defence and Strategic Studies as a subject has a global acclamation.

The security dimension has a unique dynamics – it starts with human security and goes unendingly to national and international level. Assessing human security stretches from personal security to the very basic need of societal obligations whereby security gambit is so essentially required. All developed countries have concerns for protective security whether it remains to nation's development capacity building or fostering relations with other countries for enhancing comprehensive national power signifying importance of security and its academic relationship. Defence /National Security Studies as a discipline has a wider connotation and even spread out to inter disciplinary subjects - be it Humanities, Languages, Science, Management, Governance and Leadership.

1.3 Security is a buzz word and needs to be understood in its entirety with strategic and non strategic overtones. Security is complimentary to the development of a nation while development processes in developing countries suffer due to incomprehension of security issues.

1.4 The subject of Defence / National Security Studies therefore holds unique significance and demand security consciousness in society in which academics have a wider role to play. LOCF definitely is a moderate attempt in this regard to introspect the causes and reasons of rigidity and tepidity which revolves around the subject. However, there is a dire need of equipping our young academic community. For instance, at a foundation level there is a desire for any career launcher in academics to acquire overall knowledge, increase horizon including getting conversant with communication skills and teaching aids. Such an incremental course work is essential and may

be conceived for a period of at least five years until one is found eligible for next level. This may be considered as a basic step for the success of LOCF.

1.5 A student teacher relationship would ideally be suited if it involves lot of interaction demanding sustained efforts and unconventional experimentation. Unlike abroad, we have total emphasis on class room teaching and over the period it loses interests among students and teachers alike. There is a need to expose the students to the environment, encourage *avante-garde* or off beat eccentricism until remained barrack centric.

1.6 LOCF undertakes/suggest such extra ordinary outlandishness by inspiring not only transgression into other subjects of interests but also class outfield study behavior to make the students understand the domain eco system. In fact, the field studies also equips the students with all the attributes given in the conceptualization of LOCF and acquiring added contrivance or maturing them enough to be in a state of decision making in their future endeavor. Another deepening issue that despite so much of talks about promoting academic link with professional bodies such as industry, research centers, think tanks, the services and even the bureaucracy - the largely seen twin Siamese stays apart.

1.7 Academics can extend to such excellence of professional bodies – an opportunity for higher education and gaining specialization by undertaking research activities. In this context, the mandatory conditions warding off professionals to the academic programme may be dispensed with providing students a window for better synergy.

1.8 LOCF indeed is a sterling opportunity or a pathway in striking at any accustomed predictable.

2. Learning Outcomes Based Approach to Curriculum Planning for Defence and Strategic Studies (at Under Graduate level)

2.1 It is said that there's nothing as practical as good theory. It may also be said that there's nothing as theoretically interesting as good practice. The fundamental premise underlying the learning outcomes based approach to curriculum planning is that the bachelor's degree programme in Defence and Strategic Studies shall be awarded on the basis of demonstrative achievements outcomes as:

- 2.1.1 Attainment of sound knowledge about the basics that the students is expected to imbibe in the subject.
- 2.1.2 Having a clear understanding of the key concepts related to the subject along with their applications in real life situations.
- 2.1.3 Development of analytical skills so as to be able to appreciate the importance of the subject and spread its awareness.
- 2.1.4 Inculcate a spirit of nationalism and develop good values contributing to building strong national character.

3. Nature and Extent of Bachelor's Degree Programme in Defence and Strategic Studies (Honours/Regular Course)

3.1 Earlier known as Military Science, Military Studies or Defence Studies is a recognized degree in 'Defence and Strategic Studies' by the University Grants Commission, New Delhi at Undergraduate, Postgraduate, Doctorate and Post Doctoral level. However, the degree programme in Defence and Strategic Studies is only at few places while it exists as one of the elective subject in most of the places. The approach to the study in the discipline is interdisciplinary as the subject broadly covers military history, war, national security studies, international relations, peace and conflict studies, international terrorism, defence economics, military psychology/sociology and other aspects related to military or security of the nation and as such encompasses such aspects like geopolitics and military geography, science and technology, economics of defence, conflict management and conflict resolution, etc. The framework is intended to allow flexibility and innovation in programme design and syllabi development, teaching-learning process and assessment of student learning levels.

4. Aims of the Bachelor's Degree in Defence and Strategic Studies (Honours/Regular Course)

4.1 Defence and Strategic Studies as a subject and degree cover all strategic aspects that can have a bearing on the learning of security issues in the defence of the country. The overall objectives of bachelor's degree programme in Defence and Strategic Studies are to –

- 4.1.1 Formulate qualitative description combining domain knowledge with gains from choice based credit system enabling students to qualify for jobs even outside the discipline demonstrating mobility of service.
- 4.1.2 Instill the graduates skills, knowledge and abilities to understand national security issues analytically which to help the students to pick up adequate comprehension on matters security. Infuse each graduate with a desire to be a lifelong learner and plan to pursue professional courses related to Defence and Strategic Studies to be a domain specialist.
- 4.1.3 Imbue an appreciation of one's civic duties and responsibilities towards society and demonstrate knowledge of contemporary or emerging threats, challenges or issues thereby contributing to strategic culture.
- 4.1.4 Encourage leadership qualities amongst students and raise ability to work as a team.
- 4.1.5 Gain an understanding of professional ethics and to apply in the field of national security rather than replicate curriculum content knowledge
- 4.1.6 Demonstrate the ability to apply one's disciplinary knowledge and skills to new frontiers and be a partner ensuring global competitiveness.
- 4.1.7 Undertake mechanism to periodically review of teaching programmes including adoption of teaching learning techniques.

5. Graduate Attributes in Defence and Strategic Studies (Honours/Regular Course)

5.1 It has been generally observed that students at the time of joining graduate programme or at the end of such studies remain unclear and confused in deciding their future course of study. For instance, while course in Defence and Strategic Studies is always not an exclusive degree programme, but is served at post graduate level, students are generally oblivious of certain realities. However, having taken up the discipline in Defence and Strategic Studies at under graduate level, the student must reflect a sense of maturity, good attributes, values and skills

enabling him/her to decide further course of action in terms of should he/she go in for higher studies or having attained a particular skill take to the job and simultaneously pursue higher studies. Such an arrangement works abroad quite successfully and makes them more professional and responsible in their career pursuit. In addition, the attributes in a graduate of Defence and Strategic Studies are expected to exhibit the following:

- 5.1.1 **Disciplinary knowledge and skills:** Capable of demonstrating (i) comprehensive knowledge and understanding of major concepts, theoretical principles and contemporary strategic environment in Defence & Strategic Studies and its different subfields.
- 5.1.2 **Skilled communicator and Critical thinker:** Ability to transmit complex information and ability to employ critical thinking relating to national security issues in a clear and concise manner in writing and oral skills.
- 5.1.3 **Sense of inquiry:** Capability for asking relevant/appropriate questions relating to issues and problems in the field of Defence & Strategic Studies and planning, executing and reporting the results of any issues related to national/international security
- 5.1.4 **Team player/Leader:** Capable of working effectively in diverse teams in both classroom, in society and real life situations.
- 5.1.5 **Skilled project manager:** Capable of identifying/mobilizing appropriate resources required for a project, and manage a project through to completion, while observing responsible and ethical conduct.
- 5.1.6 **Digitally literate:** Capable of using computers to understand strategies and tactics in conflicts.
- 5.1.7 **Ethical awareness/reasoning:** Capable of embracing and demonstrating the ability to demonstrate moral/ ethical values in one's work and avoiding unethical behavior such as fabrication, falsification or misrepresentation of data or committing plagiarism, and appreciate environmental and sustainability issues.
- 5.1.8 **Lifelong learners:** Capable of self-paced and self-directed learning aimed at personal development and for improving knowledge/skill development and current affairs.

6. Qualification Descriptors for a Bachelor's Degree Programme in Defence and Strategic Studies (Honours/Regular Course)

6.1 The qualification descriptors for a Bachelor's Degree programme in Defence and Strategic Studies shall include the following:

- 6.1.1 Demonstrate:- (i) Acquire a demonstrative ability towards systematic/coherent understanding in Defence and Strategic Studies, its different learning areas and areas of specializations, besides linkages with related disciplinary areas/subjects; (ii) Procedural knowledge and skills that creates different types of professionals related to national security issues, including research and development, teaching and government and public service;
- 6.1.2 Understanding national and international strategic and security issues, analyses and evaluation using methodologies as appropriate to the subject(s) for drawing interpretations and conclusions;
- 6.1.3 Communicate results of studies undertaken in security affairs in a range of different contexts using the concepts, constructs and techniques as applicable;
- 6.1.4 Able to draw on a range of current research and development work and professional materials;
- 6.1.5 Apply one's subject knowledge and transferable skills to new/unfamiliar contexts to identify and analyze different issues and analyse complex problems with well-defined suggestions for policy makers in national security issues.
- 6.1.6 Demonstrate subject-related contemporary strategic national and international issues and transferable skills that are relevant to Defence and Strategic Studies - related job trades and employment opportunities in the field of teaching, armed/paramilitary/security forces and journalism.

7. Programme Learning Outcomes relating to Bachelor's Degree Programme in Defence and Strategic Studies (Honours/Regular Course)

- 7.1 Upon completion of the programme of Bachelor's in Defence and Strategic Studies, a student should have acquired basic competency in strategic affairs covering a wide spectrum of interstate security to global security issues including non kinetic dimensions.
- 7.2 Shall develop capability in understanding the implications of use and threat of use of force in International relations.
- 7.3 Shall seek, identify and apply the acquired knowledge in defence and strategic studies on contemporary issues of strategic relevance.
- 7.4 Ability to move from LOTS (Lower Order of Thinking Skills) to HOTS (Higher Order of Thinking Skills) in Defence and Strategic Studies.
- 7.5 The learning of strategic studies shall arm the candidates to independently choose further course of action in his/her life whether pursuing higher education by taking specialized course in honours or identifying a career for himself or herself.

7.6 Course - Level Learning Outcomes - Learning Outcomes-Based Curriculum Framework (LOCF) is an educational theory that bases each part of an educational system around goals (outcomes). By the end of the educational experience, each student should have achieved the goal. There is no single specified style of teaching or assessment in LOCF; instead, classes, opportunities, and assessments should all help students achieve the specified outcomes. The role of the faculty adapts into instructor, trainer, facilitator, and/or mentor based on the outcomes targeted.

7.7 Some examples of course-level learning outcomes that a student of this course is required to demonstrate are indicated below:-

7.7.1 Clarity

The focus on outcomes creates a clear expectation of what needs to be accomplished by the end of the course. Students will understand what is expected of them and teachers will know what they need to teach during the course. Clarity is important over years of college and when team teaching is involved. Those designing and planning the curriculum are expected to work backwards once an outcome has been decided upon; they must determine what knowledge and skills will be required to reach the outcome.

7.7.2 Flexibility

With a clear sense of what needs to be accomplished, instructors will be able to structure their lessons around the student's needs. LOCF does not specify a specific method of instruction, leaving instructors free to teach their students using any method. Instructors will also be able to recognize diversity among students by using various teaching and assessment techniques during their class.

7.7.3 Comparison

LOCF is meant to be a student-centered learning model. The institutions can compare outcomes to determine what credits to award the student. A potential employer can look at records of the potential employee to determine what outcomes they have achieved. They can then determine if the potential employee has the skills necessary for the job.

7.7.4 Involvement

Student involvement in the classroom is a key part of LOCF. Students are expected to do their own learning, so that they gain a full understanding of the material. Increased student involvement allows students to feel responsible for their own learning, and they should learn more through this individual learning. Other aspects of involvement are parental and community, through developing curriculum, or making changes to it. Parents and community members are asked to give input in order to uphold the standards of education within a community and to ensure that students will be prepared for life after college.

7.7.5 Knowledge

Upon successful completion of this course, students will acquire an excellent knowledge of the biblical concepts taught in the epistle to the Colossians and will be familiar with major theological themes.

7.7.6 Skills

Upon successful completion of this course, students will be able to reflect critically on various New Testament theological themes and issues and their contemporary relevance.

7.8 Discipline Specific Elective (DSE) – Some examples of course-level learning outcomes that a student of this course is required to demonstrate are indicated below:-

7.8.1 Cyber risk is now firmly at the top of the international agenda as high-profile breaches raise fears that hack attacks and other security failures could endanger the global economy. The Global Risks 2015 report, published in January by the World

- Economic Forum (WEF), included this rather stark warning: "90 percent of companies worldwide recognize they are insufficiently prepared to protect themselves against [cyber attacks]." Therefore, The DSE paper 'Cyber Security' will help the students understand that how cyber security is emerging a major threat to national security of a nation.
- 7.8.2 Remote sensing is the acquisition of information about an object or phenomenon without making physical contact with the object and thus in contrast to on-site observation, especially the Earth. Remote sensing is used in numerous fields, including geography, land surveying and most Earth Science disciplines and also has military, intelligence, commercial, economic, planning, and humanitarian applications. The paper 'Remote Sensing and National Security' focuses on the national security issues in case of space war between nations.
- 7.8.3 The paper 'Legal Aspects of International Security' is based on the International Law related to war and conflicts. A core component of international law is the law governing the use of force between states and the rules governing the conduct of hostilities. The area encompasses questions such as permissible use of force under the U.N. Charter, the scope and application of the Geneva Conventions; issues relating to peacekeeping and stability operations, conflict resolution, and post-conflict reconstruction; and legal responses to contemporary challenges, such as failing and fragile states, the proliferation of weapons of mass destruction, transnational crime, and terrorism.
- 7.8.4 Terrorism is, in the broadest sense, the use of intentionally indiscriminate violence as a means to create terror among masses of people; or fear to achieve a religious or political aim. The increased use of suicide attacks from the 1980s onwards was typified by the September 11 attacks in New York City and Washington, D.C. in 2001. Therefore, This paper 'International Terrorism' will acquaint students how terrorism has become a global concern especially for India.
- 7.8.5 The emergence of a number of non-state actors, such as terrorist networks, drug cartels and maritime piracy networks, and intra-state conflicts (e.g. civil wars) have assumed importance as new-age threats to the national security of present-day states. So the need of the hour for the students of Defence and Strategic Studies disciplines

is to understand the emerging nontraditional threats to security in contemporary times.

7.8.6 The papers 'WMD, Nuclear Proliferation and National Security' and 'Defence Mechanism of Modern States' will be focusing on the risk of proliferation of nuclear weapons and how the defence mechanism require major changes in the war of 21st century. The majority of traditional concepts of war have become irrelevant and obsolete.

7.8.7 The paper 'Conflict Resolution and Peace Building' deals with various aspects of resolving conflicts and maintaining international peace and security. Various methods and techniques of conflict resolution and peace building will help them understanding the importance of peace. Besides, role of UN, NGO's and other agencies has also been included in this paper.

7.9 Generic Elective (Interdisciplinary) – Some examples of course-level learning outcomes that a student of this course is required to demonstrate are indicated below:-

7.9.1 The **choice based credit system** not only offers opportunities and avenues to learn core subjects but also explore additional avenues of learning beyond the core subjects for holistic development of an individual. Choice based credit system (CBCS), in the layman's terms, is where the students can choose the prescribed courses, as the core, and elective or soft skill courses, from a range of options, rather than to simply consume what the curriculum offers. Therefore, a student enrolled for B.A./B.A. (Hons) in Defence and Strategic Studies will have the advantage of reading some Generic Elective (interdisciplinary) subjects also.

7.9.2 The papers like 'General Economics' will introduce them with the general principles of economics whereas 'Military Sociology' not only acquaint them with the general sociology but also with sociological issues faced by the soldiers during the service as well after retirement and the problems of resettlement and rehabilitation after war. 'International Relations' as discussed above will enable them to understand the basic issues of IR in the contemporary times.

7.9.3 In this part 'Functional Research Methodology' will help them understand the basic concepts of research enabling them to do research at higher level later. The issues of

'Human Rights' have become so sensitive that various international Humanitarian Laws have been framed to protect the various basic human rights in all the countries. Examples of rights and freedoms which are often thought of as human rights include civil and political rights, such as the right to life, liberty, and property, freedom of expression, pursuit of happiness and equality before the law; and social, cultural and economic rights, including the right to participate in science and culture, the right to work, and the right to education.

7.9.4 The potential of the Media in Conflict and post-conflict situations remains a net positive, and has been sadly underutilized to this point in time. Media and journalism can be a great assistance in conflict management and peace building. However, the power they have is also limited, as they will never be able to eliminate armed conflicts altogether. The media can be a good tool in a healthy and functioning environment but more is needed than ethical and responsible reporting to ensure lasting peace and safety.

7.10 Ability Enhancement Course/Skill Based Subjects (AEC)– Some examples of course-level learning outcomes that a student of this course is required to demonstrate are indicated below:-

7.10.1 Journalism is the activity of gathering, assessing, creating, and presenting news and information. It is also the product of these activities. Journalism can be distinguished from other activities and products by certain identifiable characteristics and practices. Defence journalism, though very much a part of modern day journalism, has practically very little literature for reference. Being the first book on defence journalism, with special reference to India, it analyses the love-hate relationship between the military and the media.

7.10.2 Leadership starts at the top, with the character of the leader, with your character. In order to lead others, you must first make sure your own house is in order. Strategic leadership refers to a manager's potential to express a strategic vision for the organization, or a part of the organization, and to motivate and persuade others to acquire that vision. The first three principles of strategic leadership involve nontraditional but highly effective approaches to decision making, transparency, and innovation.

7.10.3 General Studies is one of the subjects which have major contribution in the whole civil services, state services and competitive examination. In the Prelims there is one whole Paper of General Studies and in the Mains it has its contribution. Though Optional subject also has its importance but at the same time General Studies has its own contribution. Combining with whole syllabi the ability enhancement paper 'General Studies/Current Affairs' will help students to be well informed and help them clear some doubts.

7.11 Therefore, upon completion of the programme of Bachelor's in Defence and Strategic Studies:-

- 7.11.1 A student should have acquired basic competency in strategic affairs covering a wide spectrum of interstate security to global security issues including non kinetic dimensions.
- 7.11.2 Shall develop capability in understanding the implications of use and threat of use of force in International relations.
- 7.11.3 Shall seek, identify and apply the acquired knowledge in defence and strategic studies on contemporary issues of strategic relevance.
- 7.11.4 Ability to move from LOTS (Lower Order of Thinking Skills) to HOTS (Higher Order of Thinking Skills) in Defence and Strategic Studies
- 7.11.5 The learning of strategic studies shall arm the candidates to independently choose further course of action in his/her life whether pursuing higher education by taking specialized course in honours or identifying a career for himself or herself.
- 7.11.6 The course curriculum in Defence and Strategic Studies is designed to encourage the acquisition of disciplinary/subject understanding, gain academic knowledge and professional skills required for any career pursuit be it choosing for higher studies or a job. The outcome based approach, particularly in the context of Defence and Strategic Studies for undergraduate programme will incorporate a significant shift from teachers centric to learner centric pedagogies and from specific to active/participatory pedagogies where emphasis will be on field Study, educational tours, writing assignments, seminar presentation and Tutorials etc. Teaching, therefore, becomes more interesting and absorbing aiming at demonstrative learning.

- 7.11.7 **Educational Tours** – The visit to Defence institutions or defence related historical locations like forts and other archeological sites will provide the students with a first-hand experience of the topics of study and emphasize their importance and significance to the present world. Ship visits and a visit to view armaments that are open to public viewing like museums etc will provide a closer look at weapons that were used over the years and give an idea of evolution of arms and warfare in general.
- 7.11.8 **Field Study** – Taking up a small project on a related topic that could include collection of data through surveys or interviews could enhance communication skills of the students and enable them to propose a study subject and produce a report based on the data collected. This will form a vital part of the skill acquisition to undertake further research.
- 7.11.9 **Writing Assignments**- Since Defence & Strategic Studies would also entail extensive writing ability, practical training in writing essays, reports and favoring or opposing an argument or thesis, students must continuously be subjected to assignment writing so that they are well versed with the nuances of writing for a variety of purposes.
- 7.11.10 **Seminar Presentation** – Conducting seminars where student choose specific topics on which they research and present to an audience forms a vital part of developing skills of communication as well as organizing thought in a logical and cohesive manner. Every course teacher can utilize this technique to evoke interest in students on a particular topic or approach the same topic from a multiplicity of approaches.

11. Teaching – Learning Process in Defence and Strategic Studies (Honours/Regular Course)

- 11.1 Well-written learning objectives can give students precise statements of what is expected of them and provide guidelines for assessing student progress. Clearly defined objectives form the foundation for selecting appropriate content, learning activities, and assessment measures. If objectives of the course are not clearly understood by both instructor and students, if your learning activities do not relate to the objectives and the content that you think is important, then your methods of assessment, which are supposed to indicate to both learner and instructor how effective the learning and teaching process has been, will be at best misleading, and, at worst, irrelevant or unfair.
- 11.2 The core papers 'War and its Various Aspects' and 'Military History of India' are the foundation courses for the student of Defence and Strategic Studies enabling them to understand the basic conceptual aspects of war. It will also help them to understand the basic causes of war and various types of war i.e. economic warfare, psychological warfare and economic warfare in detail.
- 11.3 Throughout the long military history of ancient India foreign invasion would be reoccurring, but most warfare was between Indian Kingdoms. The formidable Himalayas largely separate India from the rest of Asia leaving the many kingdoms of ancient India to battle for dominance. The paper 'Military History of India focuses on the battles fought in India, their causes and consequences in detail. This paper includes the prominent battles like battle of Hydaspes, Tarain, Panipat, and will acquaint students with Mughal art of war, Maratha art of war and Military system of the Sikhs.
- 11.4 India needs a National Security Strategy urgently. The world is changing very fast. New security challenges have arisen. In the absence of a coherent strategy, the government's responses will remain ad hoc and partial. The core course also includes the papers like 'International Relations', 'National Security' and Security problems related to India which will enable the students to know the defence aspects of

International relations and conceptual aspects of national security and especially the national security problems both internal and external.

11.5 The paper 'India's Maritime Security' covers the various threats emerging from the sea and impacting Indian naval security. The environment in which India has to consider its maritime security includes the high seas in the northern Indian Ocean and the maritime zones which include ports and territorial waters. The territorial waters are the areas where India possesses complete sovereign rights and extends right up to the limits of the Exclusive Economic Zone (EEZ) and Continental Shelf. Apart from this, the economic, political and strategic stakes of India will be covered in detail. Besides, regional Security and Cooperation focuses on the regional issues and efforts made by the states for bilateral and multi lateral cooperation for security and cooperation.

11.6 The core papers like 'Science, Technology and National Security' and 'Economic Aspects of India's National Security' are focused to acquaint the students about the role played by S&T in the defence of the nation and how principles of economics are applied in security of the nation and how economic issues have become more relevant in the wars of 21st century.

11.7 India's National Security Environment is determined by its geographical attributes, historical legacy, socio-economic circumstances as well as regional and global developments. The core paper 'Contemporary Strategic Environment in India' is related to contemporary security challenges being faced by India and how India is trying to acquire the status of regional power and world power. The aim of the paper is disseminate the knowledge for civil services aspirants. Besides, role of armed forces in dealing with the threats has also been focused.

11.8 Geography has always played an important role in the security of a nation. This paper is about the specific contributions which geography and contemporary military geography might make to the broader critical military studies project. A sub-discipline identifying itself as military geography emerged towards the end of the nineteenth century consolidating these endeavors around a specific objective, that of explicitly applying the tools and techniques of geographical inquiry (both physical and human) to assist in the

pursuit of military objectives. Therefore, the paper 'Geo-politics and Military Geography' is especially focused on the geo political and military geographical aspects of the national security strategy of a nation and India especially.

11.9 **Tutorials-** For facilitating better absorption of concepts and syllabus requirements, the teachers can also offer tutorials that are specifically designed to help students gain sufficient knowledge of basic concepts and ideas.

11.10 All the above mentioned methods are participatory and offer a student-based learning process and the teaching could thus become enjoyable and interactive.

11.11 The development of practical skills will constitute an important aspect of the teaching-learning process. A variety of approaches to teaching-learning process shall include:

11.11.1 Guest lecturers – Practitioners, academia, researchers and other professionals are invited to talk on a particular topic related to Defence & Strategic Studies.

11.11.2 Seminars – Groups of individuals within the University or from other institutions are brought to discuss several aspects of a particular subject of topical interest.

11.11.3 Tutorials – Additional help from the teachers is offered to clarify concepts and ideas.

11.11.4 Workshops – enabling the exchange of ideas on a particular theme.

11.11.5 Peer teaching and learning – identifying senior students or student friends who can offer additional insight into the subject.

11.11.6 Practicum – Sand modeling and map making are vital for clear understanding of a host of issues

11.11.7 Project and field-based learning – Students completing projects that employ technical skills and test writing ability and frequent field visits could form a vital portion of learning methodology.

- 11.11.8 Open-ended project work – allowing students to choose topics of their own interest in the course of study and presenting using multimedia or as written report can be effective.
- 11.11.9 Technology-enabled learning – Swayam, MOOCs and other web based curricula can be introduced to students who can benefit from Information technology.
- 11.11.10 Interaction with Defence personnel and research establishments etc. – A unique opportunity for students of Defence & Strategic Studies is the opportunity to meet practitioners especially defence personnel as guest lecture, motivational component or personal account of experience in the armed forces. Think tanks and other research establishments offer internships that can serve as significant training ground for future careers.
- 11.11.11 In addition, problem-solving skills and higher-order skills of reasoning and analysis will be encouraged among students for personality building. The recommended use of prescribed text books and e-learning resources and others self study materials including increasing use of team based activities and interactions will be designed to promote the development of students and teachers alike.
- 11.11.12 Such detailed outpouring by students on new conceptualization will indeed make them feel more aggressive in knowing the subject; confident, more talented and articulate in communication and sharing of thoughts, also acquire better market potential and competitive in outlook, besides reposing faith in country's higher education system.

12. Assessment Methods

12.1 An evaluation of student's achievement in Defence and Strategic Studies will be aligned with the course/program learning outcomes and the academic and professional skills that the programme is designed for. A variety of determining methods that are appropriate within the disciplinary area of any other related subject will be tried. Since the subject has also practical examination, the added assessment oral and written, closed-book and open-book tests; practical assignments/report writings, viva voce examinations and interviews etc can be used.

12.2 While the principal assessment method could be written assessment, oral tests could also be administered. Seminars could form part of the assessment where the student's ability to conceive a topic, present it in a cogent manner, use of technology to illustrate the topic and arguments and counter arguments about the seminar subject can be employed. Open book tests encourage the student to source arguments and substantiate them.

12.3 The candidates will also be evaluated on the basis of field visits, contemporary strategic environment evaluations, outputs from collaborative work, portfolios on field visits activities undertaken.
