

ADMISSION PROSPECTUS 2026-27

DEPARTMENT
OF
BIOTECHNOLOGY

VEER NARMAD SOUTH GUJARAT UNIVERSITY
SURAT

From the Desk of Honorable Vice Chancellor

Dr. Kishorsinh N. Chavda

Vice Chancellor

The major benefit of any educational system is that it improves personal lives and helps society to run smoothly. It brings positive changes in human life and behavior. Formal higher education is very important to country's economy as a source of trained and educated personnel. Veer Narmad South Gujarat University, Surat is moving ahead to fulfil the immediate need of highly qualified and well educated individuals by enhancing the quality of higher education equally with implementation of National Education Policy 2020 and moving in direction of strengthening India as a global superpower.

The teaching staff of Department of Biotechnology along with non teaching staff members are striving hard to train students meeting various global challenges as witnessed currently due to Pandemic COVID-19, and development of processes for the benefit of ecosystem as a whole. My blessings and best wishes to students of Department of Biotechnology, Veer Narmad South Gujarat University, Surat in their endeavor to achieve research and academic excellence in the field of Biological Sciences and its applications.

From the Desk of Respected Registrar

Dr. R. C. Gadhi
Registrar

University education includes teaching, research and activities related to social services, and it includes at both graduate and postgraduate level. Veer Narmad South Gujarat University campus comprises various amenities for the students, which help them to fulfil their extracurricular hobbies apart from their regular course studies.

Our University has taken immense measures to bring qualitative and quantitative changes in the field of higher education. University has excellent infrastructure facilities: Hostels, Sport Complex, Central Library with internet facility, Convention hall, Amphitheatre as well as Laboratories. University placement cell supports the students to get jobs in the respective field. My blessings are always there for all the students who really work very hard to build their bright future.

From the Desk of Former Coordinator

Dr. Minoo Parabia
Former Prof. & Head of
Biosciences Department
(Coordinator: 2006-2010)

The word technology ushered the memories of machines, electricity, transportation, computers, arms etc. Till recently none connected technology with Biology though perhaps the biotechnology was the oldest technology implemented by early mankind in terms of agriculture, cooking and using herbs as healing material.

Recently the word technology is used in connection with its commercial usefulness. Veer Narmad South Gujarat University heralded the new era of biotechnology in the year 2006. With the advent of this, quite a few of other institutions came forward to start this course in the area of South Gujarat. South Gujarat is unique area, having open sea coast, fertile plains, productive orchards and remarkable good forests on the eastern boundary. The area is traversed by 11 per perennial rivers and many tributaries. It is the blessed area with year round greenery. In short the area is biologically very rich.

This prompted the organizers to start department of biotechnology as a five year integrated course. The industrial development also brought in severe pollution. So, the biologist and scientist were challenged to carry out research to make use of bioproducts to earn money for the people and also to curb pollution.

I have witnessed this department developing from a scratch and day by day, step by step developing and progressing. Fortunately, the department has very enthusiastic team of teachers and administrators including supporting staff. Together, they all are working in union. The department has remarkable track record in terms of tuning out NET/SET scholars, entrepreneurs and learned graduates gracing high positions industries and business forms. I invite the citizens of Surat to promote this unique department. I wish them brilliant success in a time to come.

From the Desk of Head of Department

Dr. Gaurav Shah
Professor & Head

Advancement of science and technology and non judicial exploitation of natural resources due to globalization, organization and industrialization have resulted in serious consequences; threatening the very existence of mankind. A polluted atmosphere, unsafe water and unpleasant living conditions are giving rise to a number of epidemics (Recently Pandemic COVID-19) taking heavy toll of life on one hand while declining food production is giving a serious threat of famine on the other hand. In our world submerged in multiple problems, biotechnology emerges out as a sole solution.

Research in the field of biotechnology can help the country carve a niche for itself in genomics, bioinformatics, agriculture and plant biotech, biodiversity, biofuel, bioinstrumentation, etc. Biotechnology is being considered to have the most promising prospect in coming future and its progress can be identified as a boon to the society. We, at the biotechnology department are fully aware of the dearth of skilled youth in the society today. Their role in the world as upcoming leaders, scientists or socially aware individuals are grabbing all the eyeballs. The need of the hour being trained individuals with brilliance of mind and competence in work. Our course provides each student with effervescent self confidence and a burning desire to excel overall with an exposure to a world full of opportunities.

Department of Biotechnology

M. Sc. Biotechnology Course was started in 2006 with an aim to cater to the need of higher education in the emerging field of Biotechnology. We strive to achieve excellence and relevance in this always growing area of application related to biological sciences. Department was established in 2015. The department follows the co-education pattern and vigorously engages in teaching, research and co-curricular activities to boost up and build the career of the students. The department has a young as well as experienced, energetic and highly qualified faculty working as a team to give the best quality education to the students. The department has many laboratories which are well equipped with all necessary instruments. We have an excellent library with rich collection of textbooks, e-books, reference books, journals, bulletins, and CDs. Computer and internet facility is also available for the students.

All the students have an equal right to use these facilities available at the department. Apart from the primary thrust area of academics, the department is vigorously involved in research and teachers have completed various research projects and contributed several research publications to the scientific community. Our students have proved their academic potential with excellent results in the examination and good employment rate. Moreover, the immigration of many students to overseas for higher education and employment, as well as many foreign students currently studying in the department, indicates our global acceptance.

Department of Biotechnology

Vision: Creating the means to achieve the newer heights in the field of biological sciences for the welfare of the society.

Mission: Empowering the mankind with the means of biotechnology to prosper itself.

Objectives:

1. To convey scientific and technological knowledge and information with modern age orientation.
2. To help young learner and make them realize that science and technology, both hand in hand can enrich and develop personality, thus promising a life of success and achievement.
