: Brief about the lecture :

The Fourth Industrial Revolution (or Industry 4.0) refers to the ongoing transformation of traditional manufacturing and industrial practices in conjunction with cutting-edge smart technology. In light of the G20 India Presidency under the G20 Working and Engagement Group Think20 (T20); expert will discuss I4.0 terminology, design principles and goals, a brief history from first to the fourth industrial revolutions, I4.0 components, industrial revolutions and network relationships with special reference to manufacturing sector/industry, various 4IR challenges (Social, Economic and Organizational), threats, and opportunities as a result of adoption of I4.0 components by the industries with reference to the Indian Economy. This lecture also includes India's progress toward Industry 4.0, government initiatives to adopt Industry 4.0, and how Industrial Revolution 4.0 can help the Indian economy grow in the future.
