Statistics Paper – 7: Statistical Analytical Methods (Major/ Minor) (4 credit)

As per NEP 2020

To be implemented from the Academic year 2025-'26

Course code	MJSTC 607/MESTC 607	Weightage	Marks
Course title	Paper -- 7:Statistical Analytical Methods		
credit	4		
Teaching per week	4 hours		
Effective from	2025-'26		
Purpose of course	The purpose of the course is to developed practical applications and theoretical knowledge, learners will develop essential skills for statistical analysis in social sciences and economics		
Objective of course	The main objective of this course is to provide students with a foundational understanding of non-parametric tests. The purpose is to make students aware about the application of demography in social science and additionally, the course explores the concept of national income, its estimation methods, and income distribution using the Lorenz curve and Pareto's law.		
Programme outcomes	PO-01: Knowledge & Conceptual Understanding: Develop a strong foundation in principles and concepts across disciplines, fostering interdisciplinary learning, advance knowledge and problem-solving abilities. PO-02: Analytical & Critical Thinking: Apply critical thinking and analytical reasoning to evaluate data, hypotheses and real-world problems, leading to evidence-based conclusions. PO-03: Research & Inquiry-based Learning: Develop investigative skills through experimentation, data analysis to contribute to research and innovation. PO-04: Technical Skills: Gain hands-on experience with instrumentation and computational tools relevant to research and industry applications. PO-05: Digital & Computational Literacy: Utilize digital tools, computational techniques and emerging technologies such as AI, statistical modelling to enhance learning and problem-solving. PO-06: Environmental & Societal Responsibility: Understand the role of science in addressing environmental, health and societal challenges, promoting sustainability and ethical responsibility. PO-07: Effective Communication & Collaboration: Develop proficiency in scientific communication, both written and oral, for effective dissemination of knowledge while collaborating in multidisciplinary teams. PO-08: Innovation & Entrepreneurship: Foster an entrepreneurial mind-set by applying knowledge for innovation, technology development, and industry-oriented applications. Develop sustainable solutions to address real-world challenges in research and environmental management. PO-09: Lifelong Learning & Professional Growth: Cultivate curiosity and		

	adaptability for continuous learning, equipping students for higher education, research, and professional careers. PO-10: Ethical Leadership & Value-based Education: Develop leadership qualities, ethical values, and a sense of responsibility in applying societal progress, aligning with Indian knowledge systems and global perspectives.											
Programme specific outcomes	PSO1: Understanding Statistical Principles Graduate Should comprehend the importance and value of statistical principles and be able to convert problem description into testable research hypothesis. PSO2: Professional and Entrepreneurial Skills Development The program enhances student's professional skills and entrepreneurial capabilities, fostering independent logical and analytical thinking. It also emphasizes teamwork and leadership, preparing students for diverse environments by providing skill enhancement Certificate courses. PSO3: Real-World Problem Solving Students are trained to investigate, design, and develop practical solutions for real-world challenges, ensuring they can apply theoretical knowledge to practical situations through Experiential Learning and by providing platform for extracurricular activities. PSO4: Self-Learning and Problem-Solving Skills Students gain hands-on experience with advanced statistical tools and software, enhancing their ability to tackle real-world problems efficiently. PSO5: Performing data Analysis Graduate should be able to apply analytical and statistical methods to analyze data, interpret results, and provide solutions in various settings. PSO6: Develop Communication Skills Effectively Communicate Statistical results through clear & informative data visualizations. PSO7: Commitment to Lifelong Learning and Research The program focuses not only on imparting core education but also to developing interest in research. PSO8: Provide Employability Identify & explore career opportunities in statistics, including roles in industry, government & academia.

Course content	Unit-I: Non parametric tests: • Introduction • Comparison of parametric and non-parametric tests • Sign test for single sample and paired samples • Wilcoxon signed-rank test for one sample and paired samples • Mann-Whitney test • Median test.									40%	20
	Unit-II: Demography: • Meaning • Uses • Methods of collecting demographic statistics • Defects of demographic statistics • Mortality and Fertility: ○ Infant mortality ○ Neonatal mortality ○ Maternal mortality ○ Death rates ○ Standardized death rates									20%	10
	Unit-III: Fertility and Reproduction: • Crude Birth Rate (CBR) • General Fertility Rate (GFR) • Age specific fertility rate • Total Fertility Rate (TFR) • Gross Reproduction Rate (GRR) • Net Reproduction Rate (NRR)									20%	10
	Unit-IV: National Income: • Concept of National Income • Uses • Methods of its estimation • Lorenz curve and Pareto's law of Income distribution ○ Concept ○ Derivations and Applications.									20%	10
