OR

- B) Write the Email Letter to the superintendent of police (Traffic) Mehsana, requesting him to install traffic lights at the crossing near your college.

Q.5 A. Read the following passage and write its summary. Also, give a suitable title. **7**

The sun is a great source of energy if we could only find a good way of using it. Its energy is stored in food by plants and animals which feed on plants, and in this way it is the source of life. No one has yet invented a suitable way of using its rays to drive large machines directly. But this is not impossible. 'Solar batteries' are now used in satellites to turn the sun's rays into electricity. They give power to the radio sets which broadcast back to the earth from space-ships. Another idea is to use magnifying glasses or curved mirrors to concentrate the sun's rays at a point. This point will become very hot, and perhaps the heat could be used to raise steam. The steam could then be used to drive generators. Wires of two different metals of the right kind, when joined together, and heated at the joint, produce an electric current. This method had already been used to give power to radio sets and other devices.

B. Paragraph – Writing **3**

A) My Favourite Festival

[points-: social cultural, religious national date and month - importance
method of celebration -importance in our life - message]

OR

B) Sports and Games
