- Q. 4. A.** Analyze the role of news reports in enhancing language proficiency. How can news articles be used in ESL teaching to improve reading comprehension, vocabulary, and critical thinking skills?
- OR**
- Q. 4. B.** Create a lesson plan using the following news report to develop reading, vocabulary, and speaking skills in English. How would you structure the lesson to foster discussion and improve students' language proficiency?

Title: *LocalCommunity Comes Together to Tackle Climate Change*

By : Ravi Patel

Date: January 23,2025

Surat, Gujarat: A large group of local citizens gathered at the Surat Municipal Auditorium on Sunday to discuss the pressing issue of climate change. The event, organised by the Surat Green Initiative, was attended by environmentalists, local officials, and concerned residents, who all expressed their commitment to reducing the city's carbon footprint.

The keynote speaker, Dr. Meera Joshi, a renowned environmental scientist, highlighted the increasing challenges posed by climate change, particularly in urban areas like Surat. "The effects of climate change are already evident, with rising temperatures and extreme weather patterns. We must act now to reduce emissions and protect our environment for future generations," Dr. Joshi said during her speech.

During the event, attendees participated in various discussions, including the role of urban planning in reducing environmental impact, the importance of renewable energy sources, and how individuals can contribute to sustainability efforts in their daily lives. Several local businesses also pledged to adopt more eco-friendly practices, such as reducing plastic use and increasing recycling efforts.

The Surat Green Initiative plans to organise more events like this throughout the year to raise awareness and encourage action on climate issues. "It's inspiring to see the community come together for such a vital cause. Everyone has a role to play, whether it's through small changes at home or supporting larger policy changes," said Pradeep Shah, one of the event organisers.

As the event concluded, participants were encouraged to continue their environmental advocacy, and action plans were formed for future projects, including tree plantation drives and awareness campaigns. The hope is that this collective action will lead to a measurable decrease in Surat's carbon emissions over the coming years.
