Q.4. Read the Passage and answer the questions that follow.

Nutrition experts say that healthy eating is essential for us, not only to keep good health but also to do well in the class. What we do not realize today is that better food is actually equal to better learning in classroom. If you are unable to do well in class or not concentrate on your lessons, then a poor diet may be one of the factors responsible for it. Now-a-days we see so many children, digging into the wafer bags in the lunch break. But can this sort of junk food provide nutrition? A bag of chips is usually followed by a glass of soft drink. If taken frequently, all this is harmful for our health. There are possibilities that junk food may lead to a generation of unhealthy adults. Junk food hardly contains any vitamins. It only contains a high amount of fat and unhealthy calories. Junk food and lack of physical activity can also lead to obesity. It can be hard to change your eating habits. It helps to focus on small changes. Making changes to your diet may also be beneficial if you have diseases that can be worsened by the things you eat or drink. Symptoms from conditions such as kidney disease, lactose intolerance, and celiac disease can all benefit from changes in diet. Balanced nutrition and regular Try to set realistic goals. Our immune

system requires essential vitamins and minerals exercise are good for your health. These habits can help you lose or maintain weight. in order to function optimally. Eating a wholesome and varied diet ensures your immune system functions at peak performance and guards against illnesses and immunodeficiency problems.
