Veer Narmad South Gujarat University, Surat

Computer Science and Information Technology Faculty
Syllabus for (Semester-I and Semester-II) of
B.C.A. (Cyber Security and Data Protection)(Honours)

As per NEP-2020

To be implemented from

Academic Year: June, 2024-2025

(Including Winter Session)

Veer Narmad South Gujarat University, Surat
Bachelor of Computer Application (Cyber Security and Data Protection)
(Honours)
Under the Faculty of
Computer Science and Information Technology

Name of Program:	Bachelor of Computer Application (Cyber Security and Data Protection) (Honours)
Abbreviation:	B.C.A. (Cyber Security and Data Protection) (Honours): Four-year Integrated Program. With Multi-Level Entry and Exit option
Multi-level Exit Criteria:	<p>i) Under Graduate Certificate in Cyber Security and Computer Application: If the student wish to exit after completion of First year (Semester-1 and Semeter-2) without any back-log and secure additional 4 credits from work based skill oriented university approved courses /vocational courses / summer internship / Apprenticeship in addition to 6 credits from skill-based courses earned during first and second semester.</p> <p>ii) Diploma in Cyber Security and Data Protection: If the student wish to exit after completion of Second year (Semester-1 to Semeter-4) without any back-log and secure additional 4 credits from work based skill oriented university approved courses /vocational courses / summer internship / Apprenticeship offered at end of first or second year in addition to 6 credits from skill-based courses earned during first four semesters.</p> <p>iii) B.C.A. (Bachelor's in Computer Application) (Cyber Security and Data Protection) : If the student wish to exit after completion of Third year (Semeste-1 to semester-6) without any back-log and secure additional 4 credits from work based skill oriented university approved courses /vocational courses / summer internship / Apprenticeship offered at end of first or second year in addition to 6 credits from skill-based courses earned during first four semesters.</p>
Multi-Level Entry Criteria:	As per the norms of the Veer Narmad South Gujarat University.
Duration:	4 year of B.C.A. (Cyber Security and Data Protection) (Honors) degree program with multi level exit options at 1 st , 2 nd and 3 rd Year to obtain Certificate, Diploma, Degree and Honours Degree in Computer Application respectively.
Eligibility:	<p>Candidate must have passed standard 12th (H.S.C.) Examination in Science (Any Group) / Commerce / vocational / General stream from Gujarat Higher Secondary Board (G.H.S.E.B.) or any other equivalent board (C.B.S.E. / I.C.S.E. etc. which must be approved and possess equivalence certificate from Veer Narmad South Gujarat University) with English as one of the subject.</p> <p>In case of candidates passed out from 12th Board from General Stream; Statistics/Economics/Business Mathematics/Accountancy/Computer must be one of the subjects. In case of Students passed out with 12th (H.S.C.) vocational stream, Computer and English must be one of the subject.</p>
Objective of the Program:	Bachelor of Computer Application (BCA) (Cyber Security and Data Protection) (Honours) is undergraduate degree program in computer application area. Objective of the program is to open a channel of admission for courses in the field of Computer Science, Applications and all relevant

	<p>fields of information technologies to build career for students who have completed standard 12th (H.S.C.) and are interested in taking computing/computer Application and Information Technology as a career.</p> <p>The objective of the Bachelor of Computer Applications (B.C.A.) in Cyber Security and Data Protection program is to provide students with a comprehensive understanding of cybersecurity principles, practices, and technologies. This program aims to equip students with the necessary skills to address the evolving challenges of cybersecurity and data protection in today's digital landscape. Through a combination of theoretical knowledge and practical experience, students will develop expertise in threat detection, risk assessment, encryption techniques, network security, and incident response. The program also focuses on enhancing students' proficiency in data protection techniques, including data encryption, access control, and compliance standards. Furthermore, the program aims to foster critical thinking, analytical, and problem-solving skills in students, preparing them to assess cybersecurity risks and formulate effective strategies to mitigate threats. Ethical and professional conduct are emphasized, with a focus on ethical hacking, ethical decision-making, and adherence to industry standards. The program also prepares students for industry certifications and facilitates industry internships and placements to enhance their employability in the cybersecurity field.</p> <p>The program caters to the needs of the students aspiring to excel in the field of computer science, applications and cyber security technologies. The program is designed to develop computer professionals versatile in specialized field of Cyber Security and Data Protection. It also aim to enhance communication and interpersonal skills.</p>
<p>Program Outcome:</p>	<p>PO1: Equip students with a comprehensive understanding of cybersecurity principles, practices, and technologies.</p> <p>PO2: Develop students' proficiency in data protection techniques, including encryption, access control, and compliance standards.</p> <p>PO3: Foster critical thinking, analytical, and problem-solving skills in students to assess cybersecurity risks and formulate effective strategies.</p> <p>PO4: Promote ethical behavior and professional conduct in the field of cybersecurity, emphasizing adherence to industry standards and best practices.</p> <p>PO5: Prepare students for industry-recognized certifications in cybersecurity, enhancing their employability and career prospects.</p> <p>PO6: Provide opportunities for hands-on experience through industry internships and placements, allowing students to apply their knowledge and skills in real-world settings.</p>
<p>Program Specific Outcome:</p>	<p>PSO1: Students will demonstrate a deep understanding of cybersecurity principles, practices, and technologies, allowing them to effectively analyze and address cybersecurity threats and vulnerabilities in various contexts.</p>

PSO2: Students will possess the skills and techniques necessary to implement robust data protection measures, including encryption, access control, and compliance with data privacy laws and regulations, ensuring the confidentiality and integrity of sensitive information.

PSO3: Students will demonstrate strong critical thinking, analytical, and problem-solving skills, enabling them to assess cybersecurity risks, analyze complex security incidents, and develop effective strategies to mitigate threats and vulnerabilities.

PSO4: Students will adhere to ethical principles and professional codes of conduct in their practice of cybersecurity, demonstrating integrity, honesty, and accountability in their decision-making and behavior.

PSO5: Students will be prepared for industry-recognized to address various professional and applied challenges to meet Information Systems Security Professional, Ethical Hacking, and Data protection, validating their expertise and enhancing their credibility in the cybersecurity field.

PSO6: Students will have gained hands-on experience through industry internships and placements, allowing them to apply their knowledge and skills in real-world settings, collaborate with industry professionals, and solve practical cybersecurity challenges.

PSO7: Students will demonstrate effective communication skills, both verbal and written, enabling them to articulate complex cybersecurity concepts and findings to diverse stakeholders, including technical and non-technical audiences.

PSO8: Students will exhibit a commitment to lifelong learning and professional development, staying abreast of emerging cybersecurity trends, technologies, and best practices to remain competitive in the dynamic field of cybersecurity. They will actively seek opportunities for further education, certification, and skill enhancement to advance their careers and contribute to the advancement of the cybersecurity profession.

Program Structure:

Semester-wise Breakup of the course is given as follows :

Veer Narmad South Gujarat University, Surat
Program Structure: F.Y.B.C.A. (Cyber Security and Data Protection) (Honours)
(SEM – 1 and SEM – 2)
(w.e.f. Academic Year June, 2024-2025)
Bachelor of Computer Application (B.C.A.) – Three Year Program
Bachelor of Computer Application (B.C.A.(Hon.)) – Four Year Integrated Program

Program Structure		Semester-wise break up for the courses :				
SEMESTER – 1						
Course Code	Course Title	Course Category	Level of Course	Course Credits	Teaching Hours/week	
					Th.+Pra.	Theory
101	Communication Skills (AEC-01) [Modern Indian Language (MIL) & English language focused on language and communication skills.]	Ability Enhancement Course	100-199 Foundation/ Introductory	2	2	0
102	Mathematics (Student will opt any one course of multi-disciplinary nature from other than the computer Science and Application faculty).	Multi-Disciplinary/ Inter-Disciplinary	100-199 Foundation/ Introductory	4	4	0
103	Introduction to Computers	Minor Course	100-199 Foundation/ Introductory	4	4	0
104	Computer Programming and Programming Methodology (CPPM)	Major Course	200-299 Intermediate Level Course	4	2	4
105-01	Introduction to Cybersecurity and Information Security	Major Course	200-299 Intermediate Level Course	4	4	0
	Practical (Based on Course Code:104)	No separate credits allocated for practical. The Practical exam/viva-voce will be based on Course 104.				
106	Skill Enhancement Course-I (SEC-01) [The student will undergo field training/ internship training <u>OR</u> Select minimum one University approved and recognized 2 credit certificate course from the skill based courses list offered by the respective institute/department.] (The student need to enrol separately and pay the fees as decided by the respective institute/department)	Skill Enhancement Course	100-199 Foundation / Introductory	2	-	2
107	Value Addition Course – I (VAC-01) [The student will select minimum one University approved and recognized 2 credits certificate course from the Value Addition courses list offered by the respective institute/department.] (The student need to enrol separately and pay the fees as decided by the respective institute/department)	Value Addition Course	100-199 Foundation/ Introductory	2	2	-
Other Activities	The student is expected to participate in activities related to National Service Scheme (NCC), National Cadet Corps (NCC), adult education/literacy initiatives, mentoring school students, Elderly literacy program/ Environment preservation activities and other similar activities.			-	-	-
Total				22	18	06

Course Code	Course Title	Course Credit	University Exam Type	Exam Duration	External Marks	Internal Marks	Total Marks

Total		22			275	275	550

For Practical and Project:

- Batch Size – 40 Maximum (Desirable). Maximum 45 students can be accommodated in a batch. Separate batch should be considered if the student strength exceed 45 numbers.
- Practical includes Practical sessions for course-104. **Minimum** Four Practical hours (for course-104) per week should be allocated per batch. Out of which 4 hours will be in supervised mode and 2 hours of practical are recommended in un-supervised mode.
- The journal must be certified by the concerned faculty and by the Head of the Department, failing which the student will not be allowed to appear for External Practical Examination. Student will submit softcopy of Minor Project duly certified by the internal guide.

Internship: A student who wish to exit after successfully completion of first year (Semester-1 and Semester-2) without any backlog is required to obtain Four credits at the end of the year either through the summer internship or university approved skill based certificate courses(two courses of 2-credits each or one 4-credit course). Student is required to enrol for the certificate courses separately by paying the course fees as decided by the college/institute. For summer training, the Institute/college will grant the permission and evaluate the training outcomes. Based on satisfactory completion of the summer training, the Institute head will recommend to the university to grant four credits for summer training. The Internship/summer training/skill based certificate courses will be an audit course.[The internship cost/fees will be bear by the student.]

Skill Enhancement Course : As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit skill enhancement course out of the choices given by the college/institute (From available basket of courses as per University norms). It will be mandatory for the student to opt minimum one 2-credit Skill enhancement course out of offered courses recognised by University during semester-1 to semester-5.
(The student need to enrol separately and pay the fees as decided by the respective institute/department)

Value Addition Course: As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit Value Addition Course out of the choices given by the college/institute (From available basket of courses as per University norms). It will be mandatory for the student to opt minimum one 2-credit Value Addition Course out of offered courses recognised by the University during semester-1 to semester-4.
(The student need to enrol separately and pay the fees as decided by the respective institute/department)

Marks: : The students will enrol for the course from the given university approved list of certificate courses offered by the respective college/department. The student will select and enrol separately for any of the offered list of courses at college/department/institute and obtain respective credits. The institute will evaluate the performance (preferably continuous evolution) as per the SOP of certificate courses and on successfully completion of the course, the student will be eligible to obtain respective credits for the course. These credits will be considered and reflect in student's mark-sheet as well as in ABC(Academic Bank of Credit). These courses are mandatory and student is required to obtain the specified credits in process to acquire the certificate/diploma/degree.
[The student is required to pay separately for these courses as prescribed by the college. The college will decide the fees for these courses based on the University norms certificate course per credit fees.]

** Major Practical based Subjects: Course 104 is major courses. This course is carrying 4 credits (2 Hours of theory and 4 hours of practical per week). This subject carry 100 marks of exam weightage (50 theory and 50 practical). External and Internal distribution of marks are in ratio of 50:50 respectively. Students are required to acquire minimum passing marks from theory and practical collectively. Practical exams for course-104 (2 hours duration) will be conducted.

External exam marks (25 marks for course-104)
 Division of marks are: Exam evaluation: 20 marks + Viva-voce: 5 Marks.
 Practical examination will be conducted for course code-104.
 Students are required to pass in combined head (Theory + Practical) for each course.
 Students are required to remain present in internal and external theory and practical exams for course code – 104.

Program Passing Rules:	As per University rules.
Program Fees : (Per Semester) (One time fees and exam fees are additional as prescribed by the university) (w.e.f. Academic Year : 2024-25)	Semester Tuition Fees : Rs. 19,000/- Semester Laboratory Utilization Fees : As per B.C.A. program Semester University Exam Fees : Rs. 1200/- [Other one time /affiliation /exam fees, will be as per the norms of the University] [The fees for all certificate courses, Skill Enhancement Courses and Value Addition Courses; fees will be as per the prescribed limit for per credit as per the SOP of certificate courses decided by the university.]

SEMESTER – 2

For Practical and Project:

- Batch Size – 40 Maximum (Desirable). Maximum 45 students can be accommodated in a batch. Separate batch should be considered if the student strength exceed 45 numbers.
- Practical includes Practical sessions for course-204. **Minimum** Four Practical hours(4 hours for course-204) per week should be allocated per batch. Out of which 4 hours will be in supervised mode and balance hours in un-supervised mode.
- The journal should be certified by the concerned faculty and by the Head of the Department, failing which the student should not be allowed to appear for External Practical Examination. Student will submit softcopy of Minor Project duly certified by the internal guide.

Major Course : Major discipline is the main focus (Core) dominant subject and the degree will be awarded in that discipline. Students must secure a prescribed number of credits (50% of total credits) through core courses in the major discipline. Students can choose the courses from the pool of courses. The number of courses (subjects) in Major may vary from semester to semester.

Minor Course : Minor discipline is the broader understanding course beyond the major discipline course. It contains generic-electives for students to choose from the pool of courses. It helps students to gain broader knowledge in addition to relevant major disciplines courses as per their choices. Minor subjects may be from same or different disciplines. Student may make choices according to their interest/need, from ODL courses also.

Interdisciplinary/Multidisciplinary/Allied Courses: This is constituent discipline of the major courses and it helps learners to acquire core competence in relevant or any other independent courses of their choices. This course may be major specific or other discipline specific. Learner shall have option to choose the course from available basket of approved courses provided by the university or from any other institutions as the learner's choice. The Credit allocated for these courses is 12 credits of total credits for 3 years' bachelor's degree and four years' bachelor's degree programme.

Internship: A student who wish to exit after successfully completion of first year (Semester-1 and Semester-2) without any backlog is required to obtain Four credits at the end of the year either through the summer internship or university approved skill based certificate courses(two courses of 2-credits each or one 4-credit course). Student is required to enrol for the certificate courses separately by paying the course fees as decided by the college/institute. For summer training, the Institute/college will grant the permission and evaluate the training outcomes. Based on satisfactory completion of the summer training, the Institute head will recommend to the university to grant four credits for summer training. The Internship/summer training/skill based certificate courses will be an audit course.[The internship cost/fees will be bear by the student.]

Ability Enhancement Course (AEC): To be offered to students to achieve competency in a Modern Indian Language and English Language focused on language and communication skills. It may be a major specific course. The Credit allocated for these courses is 10 credits of total credits for 3 years' bachelor's degree and four years' bachelor's degree programme. The courses can be selected by the college/institute from available basket of approved 2-credit certificate courses provided by the university.

Skill Enhancement Course : As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit skill enhancement course out of the choices given by the college/institute (From available basket of courses as per University norms). It will be mandatory for the student to opt minimum one 2-credit Skill enhancement course out of offered courses recognised by University during semester-1 to semester-5.

(The student need to enrol separately and pay the fees as decided by the respective institute/department)

Value Addition Course: As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit Value Addition Course out of the choices given by the college/institute (From available basket of courses as per University norms). It will be mandatory for the student to opt minimum one 2-credit Value Addition Course out of offered courses recognised by the University during semester-1 to semester-4.

(The student need to enrol separately and pay the fees as decided by the respective institute/department)

Marks : The students will enrol for the course from the given university approved list of certificate courses offered by the respective college/department. The student will select and enrol separately for any of the offered list of courses at college/department/institute and obtain respective credits. The institute will evaluate the performance (preferably continuous evolution) as per the SOP of certificate courses and on successfully completion of the course, the student will be eligible to obtain respective credits for the course. These credits will be considered and reflect in student's mark-sheet as well as in ABC(Academic Bank of Credit). These courses are mandatory and student is required to obtain the specified credits in process to acquire the certificate/diploma/degree.

[The student is required to pay separately for these courses as prescribed by the college. The college will decide the fees for these courses based on the University norms certificate course per credit fees.]

**** Major Practical based Subjects:** Course 204 is major courses. This course is carrying 4 credits (2 Hours of theory and 4 hours of practical per week). This subject carry 100 marks of exam weightage (50 theory and 50 practical). External and Internal distribution of marks are in ratio of 50:50 respectively. Students are required to acquire minimum passing marks from theory and practical collectively. Practical exams for course-204 (2 hours duration) will be conducted.

External exam marks (25 marks for course-204)

Division of marks are: Exam evaluation: 20 marks + Viva-voce: 5 Marks.

Practical examination will be conducted for course code-204.

Students are required to pass in combined head (Theory + Practical) for each course.

Students are required to remain present in internal and external theory and practical exams for course code – 204.

Program Passing Rules:	As per University rules.
Program Fees : (Per Semester) (One time fees and exam fees are additional as prescribed by the university) (w.e.f. Academic Year : 2024-25)	Semester Tuition Fees : Rs. 19,000/- Semester Laboratory Utilization Fees : As per B.C.A. Semester University Exam Fees : Rs. 1200/- [Other one time /affiliation /exam fees, will be as per the norms of the University] [The fees for all certificate courses, Skill Enhancement Courses and Value Addition Courses; fees will be as per the prescribed limit for per credit as per the SOP of certificate courses decided by the university.]

Course Outcome	After studying the course, students will be able to Implement their skills at their workplace on varied roles such as computeroperator and programmer.
Course Content	<p>Unit : 1 : Fundamentals of Communication</p> <p>1.1 Definition and Meaning, Overview</p> <p>1.2 Process of Communication</p> <p>1.3 Features and Process of Professional communication</p> <p>1.4 Role of creative and critical thinking in communication</p> <p>1.5 Different forms of communication</p> <p>1.6 Communication Network in an Organization</p> <p>1.7 Barriers to communication</p> <p>Unit : 2 :Developing Listening skills</p> <p>2.1 Listening Vs Hearing</p> <p>2.2 Effective Listening</p> <p>2.3 Process of Listening</p> <p>2.4 Types of Listening</p> <p>2.5 Barriers to effective listening</p> <p>Unit : 3 : Speaking Skills</p> <p>3.1 Non-verbal Communication</p> <p>3.2 Group –discussions- Conducting G.D on giventopics(Oral Practical)</p> <p>3.3 Dynamics of Professional presentation/DraftingPresentation on given topics</p> <p>3.4 Public speaking</p> <p>3.5 Conversations and Dialogue writing</p> <p>Unit : 4 Reading Skills</p> <p>4.1 Need for Developing Efficient Reading</p> <p>4.2 Benefits of Effective Reading</p> <p>4.3 Basic steps To Effective Reading</p> <p>4.4 Types of Reading</p> <p>4.5 Reading Comprehension</p> <p>Unit : 5 Writing Skills</p> <p>5.1 Resume writing</p> <p>5.2 The art of Condensation</p> <p>5.3 Business Reports</p> <p>5.4 E-mail writing</p> <p>5.5 Blog Writing.</p>
Reference Books	<p>1.Handbook of practical Communication skills – Chrisle W. JAICO</p> <p>2.Basic Managerial Skills for all – S. J. McGrath - PHI</p> <p>3.Reading to learn – Sheila Smith & Thomas M. Methuen (London)</p> <p>4.Communication conversation Practice _ Tata McGraw Hill</p> <p>5. Communication in English – R. P. Bhatnagar & R. T. Bell – Orient Longman</p> <p>6. Good English – G. H. Vallins – Rups & Co</p> <p>7. Let’s talk English – M. I. Joshi</p> <p>8. Essentials of Business Communications – Pat & Sons, S. Chand</p>
Teaching Methodology	Class Work, Discussion, Self-Study, Seminars and/or Assignments
Evaluation Method	<p>50% Internal assessment.</p> <p>50% External assessment.</p>

Teaching per Week	4 Hrs.																																																															
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)																																																															
Review / Revision	2022-2023																																																															
Implementation Year:	A.Y. 2023-2024																																																															
Purpose of Course	To impart fundamental knowledge and develop mathematical abilities relevant to applications relevant to Computer Applications. [Student will opt any one course of multi-disciplinary nature from other than the computer Science and Application faculty. The course will be offered by the institute/college passed by the Board of Studies of University faculties other than the computer science and application faculty.]																																																															
Course Objective	To Provide a foundation in mathematical concepts and methods that are relevant to Computer Applications and develop the ability to apply mathematical knowledge and techniques to solve problems in computing.																																																															
Pre-requisite	Knowledge of Fundamentals of Mathematics of 10 th Grade Level																																																															
Course Outcomes	CO1: Define and explain the fundamental concepts of Mathematical Abilities in organizations. CO2: Students can apply set theory concepts to real-world scenario, such as analyzing survey data. CO3: Enhance student’s logical reasoning to solve problems in various contexts, such as puzzles or legal arguments by learning Truth table. CO4: Course aims to equip students with the knowledge and skills to define and operate matrices, compute solutions to business problems through the use of mathematical concepts and techniques. CO5: Course aims to develop students' ability to think logically and critically, as well as to apply mathematical concepts and techniques to real-world problems. CO6: Develop independent learning skills, including the ability to research and explore mathematical concept.

Course Content	UNIT-1: Introduction <ul style="list-style-type: none">1.1 Concepts of Programming Language<ul style="list-style-type: none">1.1.1 Introduction of Source Code, Object Code and executable code1.1.2 Algorithm and Flowchart1.1.3 Concepts of Structured Programming Language1.2 Concepts of Editor, Interpreter and Compiler<ul style="list-style-type: none">1.2.1 Introduction of C program body structure1.2.2 Character Set, concepts of variables and constants1.2.3 Identifiers, literals, Key words																																																						

1.2.4 Data types (signed and unsigned) (Numeric : int, short int, long, float, double) , (Character type: char, string) and void.

1.2.5 Concepts of source code, object code and executable code.

UNIT-2: Input/Output Statements and Operators:

2.1 Input/Output statements:

2.1.1 Concepts of Header files (STDIO, CONIO)

2.1.1.1 Concepts of pre-compiler directives.

2.1.1.2 Use of #include and #define

2.2 Input/Output Statements:

2.2.1 Input statements : scanf(), getc(), getch(), gets(), getchar()

2.2.2 Output Statements: printf(), putc(), puts(), putchar()

2.2.3 Type specifiers (formatting strings) : %d, %ld, %f, %c, %s, %lf

2.3 Operators :

2.3.1 Arithmetic operators (+, -, *, /, %, ++, --,)

2.3.2 Logical Operators (&&, ||, !)

2.3.3 Relational Operators (>, =, <=, !=)

2.3.4 Bit-wise operators (&, |, ^, <>)

2.3.5 Assignment operators (=, +=, -=, *=, /=, %=)

2.3.6 Ternary Operator and use of sizeof() function.

2.4 Important Built-in functions:

2.4.1 Use of : (strlen, strcmp, strcpy, strcat, strrev)

2.4.2 Use of : (abs(), floor(), round(), ceil(), sqrt(), exp(), log(), sin(), cos(), tan(), pow() and trunc())

UNIT-3: Decision Making statements :

3.1 if statements :

3.1.1 simple if statements

3.1.2 if...else statements

3.1.3 if...else if...else statements

3.1.4 Nested if statements.

3.2 Switch..case statements

3.2.1 Use of break and default

3.2.2 Difference between switch and if statements.

UNIT-4: Iterative statements :

4.1 Use of goto statement for iteration

4.2 while loop

4.3 do..while loop

4.4 for loop

4.5 Nested while, do..while and for loops

4.6 Jumping statement: (break and continue)

UNIT-5: Concepts of Arrays and pointer

5.1 Concepts of Single-dimensional Array

5.1.1 Numeric single dimensional Array

5.1.2 Numeric single dimensional array operations:

5.1.2.1 Sorting array in ascending or descending. (Bubble and selection)

5.1.2.2 Searching element from array (Linear Search)

5.1.3 Character Single dimensional Array

5.1.3.1 Character Single dimensional array operations:

5.1.3.2 Use of \0, \n and \t

5.2 Pointers:

5.2.1 Concepts of Pointers

5.2.2 Declaring and initializing int, float, char and void pointers

5.2.3 Pointer to single dimensional numeric array.

Course Code: 105-01

Course Title: Introduction to Cybersecurity and Information Security

Course Code	105-01
Course Title	Introduction to Cybersecurity and Information Security
Credits	4
Course Category	Major Course
Level of Course	200-299 (Intermediate Level)
Teaching per Week	4 Hrs.
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	The purpose of the "Introduction to Cybersecurity and Information Security" course is to provide students with a foundational understanding of the key principles and practices in the field of cybersecurity. This course aims to equip students with knowledge of various types of cyber threats and vulnerabilities, and the strategies used to protect information systems. By introducing essential concepts such as cryptography, network security, and information security management, the course prepares students to recognize and mitigate security risks. It also covers emerging trends and technologies in cybersecurity, ensuring students are aware of current and future challenges. Additionally, the course offers insights into career paths in cybersecurity, guiding students on the skills and certifications needed for professional growth in this critical and evolving domain. Overall, the course aims to build a solid base for further study and a successful career in cybersecurity and information security.
Course Objective	<ol style="list-style-type: none">1. Understand Fundamental Concepts: To provide students with a thorough understanding of the basic principles and terminology of cybersecurity and information security, including the CIA triad (confidentiality, integrity, availability).2. Identify and Analyze Cyber Threats: To enable students to identify various types of cyber threats and vulnerabilities, and analyze real-world cyber incidents to understand their impact on information systems.3. Learn Cryptographic Techniques: To introduce students to cryptographic principles, algorithms, and protocols, and to demonstrate how these techniques are used to protect data confidentiality and integrity.4. Gain Practical Network Security Skills: To equip students with the knowledge and skills required to secure networks, including the use of firewalls, intrusion detection systems (IDS), and securing wireless networks.5. Develop Security Management Strategies: To teach students how to develop and implement effective information security policies and procedures, manage security risks, and ensure compliance with legal and regulatory requirements.
Pre-requisite	Concepts of computer data and necessity of keeping the computers secure.
Course Outcomes	<p>CO1: Comprehensive Understanding of Cybersecurity Principles: Students will be able to explain the fundamental concepts of cybersecurity and information security, including the CIA triad, and understand the importance of these principles in protecting information systems.</p> <p>CO2: Identification and Mitigation of Cyber Threats: Students will be capable of identifying various types of cyber threats and vulnerabilities, analyzing real-world cyber incidents, and applying appropriate strategies to mitigate these threats.</p> <p>CO3: Proficiency in Cryptographic Methods : Students will demonstrate</p>

proficiency in using cryptographic algorithms and protocols to secure data, ensuring its confidentiality, integrity, and authenticity.

CO4: Practical Network Security Skills : Students will acquire practical skills in securing network environments, including configuring and managing firewalls, implementing intrusion detection systems (IDS), and securing wireless networks against common threats.

CO5: Development of Security Policies and Risk Management: Students will be able to develop and implement effective information security policies and procedures, conduct risk assessments, and ensure compliance with relevant legal and regulatory standards, enhancing the overall security posture of an organization.

Course Content

Unit 1: Fundamentals of Cybersecurity and Information Security

1.1 Introduction to Cybersecurity

- 1.1.1 Definition and importance of cybersecurity
- 1.1.2 History and evolution of cybersecurity
- 1.1.3 Key concepts: confidentiality, integrity, availability (CIA Triad)

1.2 Types of Cyber Threats

- 1.2.1 Malware (viruses, worms, trojans)
- 1.2.2 Phishing, social engineering
- 1.2.3 Denial of Service (DoS) and Distributed Denial of Service (DDoS)

1.3. Cyber Attack Vectors

- 1.3.1 Network-based attacks
- 1.3.2 Host-based attacks
- 1.3.3 Application-based attacks

Unit 2: Basic Cryptography

2.1 Introduction to Cryptography

- 2.1.1 Purpose and applications of cryptography
- 2.1.2 Symmetric vs. asymmetric cryptography

2.2 Cryptographic Algorithms

- 2.2.1 Symmetric key algorithms: DES, AES
- 2.2.1 Asymmetric key algorithms: RSA, ECC

2.3 Cryptographic Protocols

- 2.3.1 Public Key Infrastructure (PKI)
- 2.3.2 Digital signatures
- 2.3.3 Hash functions and integrity

Unit 3: Network Security Basics

3.1 Network Fundamentals

- 3.1.1 Overview of network architecture and protocols
- 3.1.2 OSI and TCP/IP models

3.2 Network Security Devices

- 3.2.1 Firewalls: types and configurations
- 3.2.2 Intrusion Detection Systems (IDS) and Intrusion Prevention Systems (IPS)

3.3 Securing Wireless Networks

- 3.3.1 Wi-Fi security protocols: WEP, WPA, WPA2
- 3.3.2 Best practices for securing wireless networks

	<p>Unit 4: Information Security Management</p> <p>4.1 Information Security Principles</p> <p>4.1.1 Information Security Management Systems (ISMS)</p> <p>4.1.2 Risk management and assessment</p> <p>4.2 Security Policies and Procedures</p> <p>4.2.1 Developing and implementing security policies</p> <p>4.2.2 Incident response planning and management</p> <p>4.3 Compliance and Legal Issues</p> <p>4.3.1 Overview of key regulations (GDPR, HIPAA, etc.)</p> <p>4.3.2 Ethical considerations in cybersecurity</p> <p>Unit 5: Emerging Trends and Careers in Cybersecurity</p> <p>5.1 Current Trends in Cybersecurity</p> <p>5.1.1 Cloud security</p> <p>5.1.2 Internet of Things (IoT) security</p> <p>5.2 Future of Cybersecurity</p> <p>5.2.1 AI and machine learning in cybersecurity</p> <p>5.2.2 Quantum computing and its impact on security</p> <p>5.3 Career Paths in Cybersecurity</p> <p>5.3.1 Roles and responsibilities of cybersecurity professionals</p>

Course code: 106
Course Title: Skill Enhancement Course (SEC-01)

Course Code	106
Course Title	Skill Enhancement Course - I (SEC – 01)
Credit	2
Category of Course	Skill Enhancement Course
Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	2 Hrs (Any or Combination of Theory/Practical/Fieldwork/Internship/Project)
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	2022-2023
Implementation Year:	A.Y. 2023-2024
Purpose of Course	<ul style="list-style-type: none"> - As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit Skill Enhancement Course out of the choices given by the college/institute. - It will be mandatory for the student to opt minimum one 2-credit Skill Enhancement Course out of the list of offered courses recognised by the University during semester-1 to semester-5. - The student can start an alternative career in the field by obtaining higher degree of knowledge in the area. - It's aimed at imparting practical skills, embedded internship, hands-on training, soft skills, life skills, such approved online courses etc. to enhance the employability of students. This may also include courses as per the need of new evolving technology.
Course Objective	Obtaining skill in particular field along with the regular curriculum of the selected program is essential. It not only enhance the skill but also provide an opportunity to develop skill in particular area where one can pursue career in future. Skill enhancement provides the opportunity and knowledge for an individual to develop and strengthen the necessary skills to gain, maintain, and advance in a chosen area. Skill enhancement programs are focused around training that combines the best practices from varieties of areas. Skill enhancement or training typically uses a combination of cognitive and behaviour problem solving approaches, both of which are used to strengthen a person's positive skill develop.
Pre-requisite	-
Course outcome	<p>CO1: Student select the area of skill as per his/her interest. The choices will be given by the institute/department.</p> <p>CO2: The student acquire basic and fundamental level of knowledge in the field that the student opted.</p> <p>CO3: Understand the insight of the area and possibility of to explore more in the field.</p> <p>CO4: Understand effective representation of problems in terms addressing the problems.</p> <p>CO5: Learn to upskill and upgrade the knowledge in the area of selected subject.</p>
Course Content and Implementation road-map.	<ul style="list-style-type: none"> (i) University has categorised and prepared the basket of the courses including approved online courses that can be offered as Skill Enhancement Course. (ii) The institute/college/department can design and implement skill enhancement course by getting approval from the relevant apex body of the university considering the SOP of the certificate course policies of the University. (iii) The institutes/college/departments can select more than one course out of the given sets of courses and offer them to their students.

	<p>(iv) The students can select any of the courses offered by the institute/college/department from the given choices and enrol for the course.</p> <p>(v) The institute/college/department will arrange appropriate resource person(s) for the course.</p> <p>(vi) The course evaluation will be taken place at the college/institute/department level based on the nature of the course.</p> <p>(vii) The institute/college/department will assess the student based on the nature of the course. The student will be granted the credits on successful completion of the course.</p>
Reference Books	<ul style="list-style-type: none"> - The reference materials and books will be decided by the Institutes/Colleges/Departments based on the selected Courses. - Minimum five copies of relevant topics are recommended to keep in the library.
Teaching Methodology	Class Work/ Discussion/ Self-Study/ Seminars/ field works/ practical training/ field work and/or Assignments.
Evaluation Method	<p>50% Internal assessment.</p> <p>50% External assessment.</p> <p>Maximum Marks: 50</p> <p>(Evaluation and Assessment will be carried out at institute level. On successful completion of the course, the student will be granted 2 credits. However, the obtained score will not be considered for S.G.P.A./C.G.P.A.)</p>

Course Title: Value Addition Course-I (VAC-01)

Course Code	107
Course Title	Value Addition Course - I (VAC – 01)
Credit	2
Category of Course	Value Addition Course
Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	2 Hrs (Any or Combination of Theory/Practical/Fieldwork/Internship/Project)
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	2022-2023
Implementation Year:	A.Y. 2023-2024
Purpose of Course	As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit Value Addition Course out of the choices given by the college/institute. It will be mandatory for the student to opt minimum one 2-credit Value Addition Course out of the list of offered courses recognised by the University during semester-1 to semester-4. The student can start an alternative career in the field by obtaining higher degree of knowledge in the area.
Course Objective	Obtaining knowledge in all or any of the components/fields like (i) Understanding India (ii) Environmental Science/Education (iii) Digital/Technological solutions (iv) Health & Wellness, Yoga education, sports, and fitness are essential for holistic development (v) Indian Knowledge system(IKS). The course components should be among these five categories/fields and as per the Curriculum and Credit Framework for Undergraduate Programmes of the UGC (Page-22 of the document). The purpose is to impart knowledge and understand the necessities of these aspects in life to make the healthy society and nation. It help in development of a dedicated and responsible citizen of the country by adding value to the life.
Pre-requisite	-
Course outcome	CO1: Student select the area of Value addition as per his/her interest. The choices will be given by the institute/department. CO2: The student acquire basic and fundamental level of knowledge in the field that the student opted. CO3: Understand the insight of the area and possibility of to explore more in the field. CO4: Understand effective representation of problems, solutions and insights of the challenges and problems of the peer subject relevant to value addition. CO5: Learn to upskill and upgrade the knowledge in the area of selected subject.
Course Content and Implementation road-map.	(i) The university has categorised and prepared the list of the courses that can be offered as Value Addition Course. (ii) The institute/college/department can design and implement skill enhancement course by getting approval from the relevant apex body of the university considering the SOP of the certificate course policies of the University. (iii) The institutes/college/departments can select more than one course out of the given sets of courses and offer them to their students. (iv) The students can select any of the courses offered by the institute/college/department from the given choices and enrol for the course. (v) The institute/college/department will arrange appropriate resource person(s) for the course.

	<p>(vi) The evaluation will be taken place at the college/institute/department based on the nature of the course.</p> <p>(vii) The institute/college/department will assess the student based on the nature of the course. The student will be granted the credits on successful completion of the course.</p>
Reference Books	<ul style="list-style-type: none"> - The reference materials and books will be decided by the Institutes/Colleges/Departments or as per the university guidelines based on the selected Courses. - Minimum five copies of relevant topics are recommended to keep in the library.
Teaching Methodology	Class Work/ Discussion/ Self-Study/ Seminars/ field works/ practical training/ field work and/or Assignments.
Evaluation Method	<p>50% Internal assessment.</p> <p>50% External assessment.</p> <p>Maximum Marks: 50</p> <p>(Evaluation and Assessment will be carried out at institute level. On successful completion of the course, the student will be granted 2 credits. However, the obtained score will not be considered for S.G.P.A./C.G.P.A.)</p>

Internship: Student willing to exit the program at the end of the two semesters and to avail the Certificate in Computer Application or exit the program at the end of the first four semesters and to avail the Diploma in Computer Application, it is essential to acquire four credits from internship. A key aspect of the internship is induction into actual work situations. Internships involve working with local industry, government or private organizations, business organizations, artists, crafts persons, and similar entities to provide opportunities for students to actively engage in on-site experiential learning. In option to these internships, the student can avail such four credits by availing two 2-credit university approved courses during any of these semesters. The student is required to enroll and avail these 4-credits and produce the evidence in process to opt the multi-level exit option after successfully completion of first year (two semester) or second year(four semesters).

Semester - 2

Course Code: 201

Course Title: Ability Enhancement Course-02

Course Code	201
Course Title	Ability Enhancement Course – 02 [Title of the course will be the one selected by the student from courses offered by college/institute out of the course basket offered by the University under the Ability Enhancement courses]
Credits	2
Course Category	Ability Enhancement Course (AEC-02)
Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	2 Hrs
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	2022-2023
Implementation Year:	A.Y. 2023-2024
Purpose of Course	To be offered to students to achieve competency in a Modern Indian Language and English Language focused on language and communication skills. This will be an elective course. Can be selected from the list of elective options available under the basket of Ability Enhancement certificate Courses offered by the University.
Course Objective	The course aim at enabling the students to acquire and demonstrate the core linguistic skills, including critical reading and expository and academic writing skills that help students articulate their arguments and present their thinking clearly and coherently and recognize the importance of language as a mediator of knowledge and identity. They would also enable students to acquaint themselves with the cultural and intellectual heritage of the chosen MIL and English language, as well as to provide a reflective understanding of the structure and complexity of the language/literature related to both the MIL and English language. The courses will also emphasize the development and enhancement of skills such as communication, and the ability to participate/conduct discussion and debate.
Pre-requisite	Knowledge of English at H.Sc.(12 th) Level
Course Outcomes	The list of Electives are showing individual course's Course Outcomes.
Mapping between Course Outcomes(CO) with Program Specific Outcomes(PSO)	The list of Ability Enhancement Elective courses are showing mapping between Course Outcomes(CO) with Program Specific Outcomes (PSO) for individual courses.
Course Content	The list of Electives are showing individual course's Course Contents.
Reference Books	<ul style="list-style-type: none">- The list of reference books will be decided by the Institutes/Colleges/Departments or as per the university guidelines based on the selected Courses.- Minimum five copies of five different titles relevant topics are recommended to keep in the library. Electives are showing individual course's reference books.
Teaching Methodology	Class Work, Discussion, Self-Study, Seminars and/or Assignments
Evaluation Method	50% Internal assessment. 50% External assessment.

Course Code: 202-01
Course Title: Computerized Financial Accounting

Course Code	202-01
Course Title	Computerized Financial Accounting [Title of the course will be the one selected by the student from courses offered by college/institute out of the course basket offered by the University under the Multi-Disciplinary courses or Inter-disciplinary courses.]
Credit	4
Course Category	Multi Disciplinary Course – 02
Level of Course	100-199 (Foundation / Introductory)
Teaching Per Week	4 Hours
Review/Revision	2022-2023
Implementation Year	A.Y.2023-24
Minimum weeks per Semester	15 (Including Classwork, examination, preparation, holidays etc.)
Purpose of Course	<ul style="list-style-type: none"> - To impart knowledge about accounting and how the accounts can be maintained using computer software. - This will give an idea to understand the Financial accounting terminologies and the model which is computerized. - [This is constituent discipline of the major courses and it helps learners to acquire core competence in relevant or any other independent courses of their choices. This course may be major specific or other discipline specific. Learner shall have option to choose the course from available pool of courses or from any other institutions as the learner’s choice. - Interdisciplinary course can help to gain the skills needed to adapt to a rapidly changing workplace, combining theory with practice to help students develop valuable transferable skills. - Multi-disciplinary course allows the students to understand the power of new ideas. It helps them to develop a pragmatic attitude by allowing them to decide what subjects they will opt for and what could be their possible benefits. They get time to make a decision by calculating the risks & advantages. - Student can opt any one course of multi-disciplinary nature from other than the computer Science and Application faculty. The course will be offered by the institute/college passed by the Board of Studies of University faculties other than the computer science and application faculty.]
Course Objective	<p>The course will give fundamental ideas about the accounting software and as a course study, the students can understand how the accounting software works. It also give an idea about various terminologies related to the computerized financial accounting.</p> <ul style="list-style-type: none"> - Integration of Knowledge and Skills: One objective of a multidisciplinary course is to foster the integration of knowledge and skills from different disciplines. By combining various areas of study,

students can gain a holistic understanding of a particular topic or problem. This objective aims to break down the traditional boundaries between subjects and encourage students to see connections and relationships across different fields.

- Promoting Critical Thinking and Problem Solving: Another objective is to enhance students' critical thinking and problem-solving abilities. Multidisciplinary courses often involve complex real-world issues that require a multifaceted approach. By engaging with diverse perspectives and methodologies, students develop the capacity to analyze problems from multiple angles, think creatively, and propose innovative solutions.
- Enhancing Collaboration and Communication Skills: Collaboration and effective communication are essential skills in today's interconnected world. Multidisciplinary courses aim to cultivate these skills by providing opportunities for students to work collaboratively with peers from different disciplines. Through group projects, discussions, and presentations, students learn how to articulate their ideas, listen actively to others, and collaborate effectively to achieve common goals. This objective prepares students for interdisciplinary work environments and encourages the exchange of ideas across disciplinary boundaries.

Course Outcome

CO1- After learning this subject student will be able to know the basic concepts of Financial Accounting & use of a good Financial Accounting Software

CO2- Student will able to learn basic about financial accounting and its concepts

CO3- Students will able to learn about transaction and types of accounts

CO4- Student will able to learn the book-keeping concept

CO5- Student will able to know about the journal and other related details

CO6- Student will learn about the ledger and trail balance

Purpose of Course	An Operating System (OS) is a software that manages computer hardware and software resources and provides common services for computer programs. The operating system is an essential component of the system software in a computer system. Application programs usually require an operating system to function. The course is based on open source operating systems like Linux.									
Course Objective	<ol style="list-style-type: none"> 1. To understand functionality provided by an Operating System. 2. To make aware with basic concepts of Windows O. S. Management. 3. To learn about device management. 									
Pre-requisite	Basic knowledge of computers.									
Course Outcomes	<p>CO1: Students will learn how operating system is important for computer system and what is the role of an OS, and also learn different types of operating system and their services.</p> <p>CO2: Students will be able to understand the structure and organization of file system.</p> <p>CO3: To differentiate between windows and linux OS</p> <p>CO4: To install and maintain linux workstation and also able to manage user accounts.</p> <p>CO5: To understand devices, usage of devices, scheduling algorithms and decide which is the best one.</p> <p>CO6: Students will be able to develop application the coordinate with respective OS in a much better way which is an essential.</p>

Review / Revision	2022-2023																																																						
Implementation Year:	A.Y. 2023-2024																																																						
Purpose of Course	To understand concepts of programming using Compiler based programming language C and Interpreter based programming Language Python. To compare the code structures of Compiler based programming language 'C' and interpreter based programming language 'Python'. [Python codes can be executed using any open source IDE. This is not IDE specific course.]																																																						
Course Objective	i) Advance programming skills using compiler based programming language C. ii) Introduction of Interpreter based Programming language Python. iii) Enhancing basic programming skills using Interpreter based and Compiler based programming languages																																																						
Pre-requisite	Fundamental knowledge of computer programming using 'C' language. Knowledge of Python IDE installation is recommended.																																																						
Course Outcomes	CO1: Students will be able to learn advanced programming concept of compiler based programming language. CO2: Students will be proficient working on conditional statements, iterative Statements and fundamentals of programming concepts using C and Python. CO3: Students will be able to represent compound data using lists, tuples and dictionaries in Python programs. CO4: Students will be able to develop real world application. CO5: Students will learn important libraries like Numpy, Pandas which are useful in Data analysis, Machine Learning.

Course Outcome	- On completion of the course, the Students will be conceptually clear about the two dimensional arrays, structures and unions using 'C' programming language. - Concept of conditional statements, iterative Statements and fundamentals of programming concepts using Python.																																																						
Course Content	UNIT-1: Arrays, Structure & Union and User defined function in C programming Language 1.1 Concepts of Two-Dimensional Numeric Array 1.1.1 Declaring Two-Dimensional numeric array 1.1.2 Two-Dimensional numeric Array operations (Addition, Subtraction, Multiplication, Transpose) 1.1.3 Element Address in array(Row major and Column major)																																																						

- 1.1.4 Two-Dimensional Character Array:
 - 1.1.4.1 Declaring& Initializing Two-Dimensional character array
 - 1.1.4.2 Two-Dimensional character Array operations (Searching elements, copying, merging, finding length of given string)
- 1.2 Concepts of structure and Union
 - 1.2.1 Defining, declaring and Initializing structure and Union
 - 1.2.2 Typedef and accessing structure member
 - 1.2.3 Difference between structure and union
- 1.3 User defined functions
 - 1.3.1 Function return type, parameter list, local function variables
 - 1.3.2 Passing arguments to function
 - 1.3.3 Calling function from main() function or from other function.
 - 1.3.4 Function with No arguments and no return value, No arguments and are turn value, with arguments and no return value, with arguments and are turn value.
 - 1.3.5 Recursive Function

UNIT-2: Python Fundamentals

- 2.1 Concepts of Interpreter based programming language
 - 2.1.1 Structure of Python Programming language.
 - 2.1.2 Python code Indention and execution
- 2.2 Python Variables
 - 2.2.1 Naming of variables and Dynamic declaration of variables
 - 2.2.2 Comments in Python
 - 2.2.3 Assigning values to multiple variables
 - 2.2.4 Global variables
- 2.3 Python Data types
 - 2.3.1 Text(str), Numeric Type(int, float, complex), Boolean(bool)
 - 2.3.2 Setting Data types
 - 2.3.3 Type conversion(int, float, complex), casting(int, float, str)
- 2.4 User defined function.
 - 2.4.1 Defining function, Function with Parameters
 - 2.4.2 Parameter with default value, Function with return value

UNIT-3: Python Strings and Operators

- 3.1 Python Strings
 - 3.1.1 Multiline string, String as character array, triple quotes
 - 3.1.2 Slicing string, negative indexing, string length, concatenation
 - 3.1.3 String Methods: (centre, count, join, len, max, min, replace, lower, upper, replace, split)
- 3.2 Operators
 - 3.2.1 Arithmetic Operators(+, -, *, /, %, **, //)
 - 3.2.2 Assignment Operators(=, +=, -=, /=, *=, //=)
 - 3.2.3 Comparison Operators (==, !=, >, <, >=, <=)
 - 3.2.4 Logical Operators(and, or, not)
 - 3.2.5 Identity and member operators(is, is not, in, not in)

UNIT-4: Python conditional and iterative statements

- 4.1 If statement, if..elif statement, if..elif...else statements, nested if
- 4.2 Iterative statements
 - 4.2.1 While loop, nested while loop, break, continue statements.

	<p>4.2.2 for loop, range, break, continue, pass and Else with for loop, nested for loop.</p> <p>4.3 List: creating list, indexing, accessing list members, range in list, List methods (append, clear, copy, count, index, insert, pop, remove, reverse, sort).</p> <p>UNIT-5: Python Collections and Library</p> <p>5.1 Python Collections</p> <p>5.1.1 Tuples: Declaring tuple, indexing tuple, changing tuple values, adding and removing data from tuple, Use of tuple() method to create tuple, count() and index() methods.</p> <p>5.1.2 Sets: declaring set, access set data, set methods (add, clear, copy, discard, pop, remove, union, update).</p> <p>5.1.3 Dictionary</p> <p>5.1.3.1 Creating Dictionary, Adding, Accessing and Removing element</p> <p>5.1.3.2 Dictionary methods: get(),pop(), popitem(),clear(),copy()</p> <p>5.2 Introduction to Numpy and Pandas</p> <p>5.2.1 Overview of numpy</p> <p>5.2.1.1 Numpy methods (Mean, Median, Mode, Standard Deviation and Variance)</p> <p>5.2.1.2 Implementation of Numpy methods on numeric data set created using list.</p> <p>5.2.2 Pandas Dataframe</p> <p>5.2.2.1 Creating dataframe using list</p> <p>5.2.2.2 Creating dataframe using dict of equal length list</p> <p>5.2.2.3 Reading data using csv file(read_csv())</p> <p>5.2.2.4 Retrieving rows and columns from data frame using index</p> <p>5.2.2.5 Retrieving rows and columns using loc and iloc functions.</p>

Course Code	205-01								
Course Title	Digital Logic and Computer Organization								
Credits	4								
Course Category	Major Course								
Level of Course	200-299 (Intermediate Level)								
Teaching per Week	4 Hours								
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)								
Review / Revision	-								
Implementation Year:	A.Y. 2024-2025								
Purpose of Course	The purpose of the "Digital Logic and Computer Organization" course is to provide students with a fundamental understanding of digital systems and computer architecture. Through the study of digital logic principles, students learn to design and analyze basic digital circuits and logic gates. Additionally, the course covers computer organization concepts, including CPU architecture, memory systems, and input/output devices, preparing students for further study in computer science and related fields. By mastering these foundational concepts, students develop the skills necessary for hardware design, computer engineering, and software development roles in the technology industry.								
Course Objective	<ol style="list-style-type: none"> 1. Understand digital logic fundamentals, including Boolean algebra and logic circuits. 2. Explore computer organization principles, focusing on CPU, memory, and input/output devices. 3. Master number systems and data representation techniques. 4. Analyze and simplify logic circuits using methods like Karnaugh maps and Boolean algebra. 5. Gain insight into memory organization, storage systems, and memory management techniques. 								
Pre-requisite	Basic knowledge of Computer								
Course Outcomes	CO1 : Demonstrate understanding of Boolean algebra and logic gates. CO2 : Design and analyze combinational and sequential logic circuits. CO3 : Explain CPU architecture, memory systems, and I/O devices. CO4 : Implement memory management techniques and cache memory organization. CO5 : Analyze and optimize computer architecture performance. CO6 : Evaluate emerging trends in digital systems and computer organization.

	CO3								
	CO4								
	CO5								
	CO6								
Course Content	Unit 1: Introduction to Digital Logic 1.1 Basic Concepts 1.1.1 Digital vs. Analog 1.1.2 Binary systems and Boolean algebra 1.2 Logic Gates 1.2.1 AND, OR, NOT, NAND, NOR, XOR, XNOR gates 1.2.2 Gate-level minimization 1.3 Boolean Algebra and Simplification								

	<ul style="list-style-type: none">1.3.1 Boolean functions1.3.2 Simplification using Karnaugh Maps (K-Maps)1.3.3 Quine-McCluskey method1.4 Activities:<ul style="list-style-type: none">1.4.1 Practice problems on Boolean algebra simplification1.4.2 Hands-on lab session with logic gate simulators
	<p>Unit 2: Combinational Circuits</p> <ul style="list-style-type: none">2.1 Introduction to Combinational Circuits<ul style="list-style-type: none">2.1.1 Definition and examples2.2 Design and Analysis of Combinational Circuits<ul style="list-style-type: none">2.2.1 Adder, Subtractor (Half and Full)2.2.2 Multiplexer and Demultiplexer2.2.3 Encoder and Decoder2.3 Comparators and Parity Generators<ul style="list-style-type: none">2.3.1 Design and implementation of comparators2.3.2 Parity generator and checker circuits
	<p>Unit 3: Sequential Circuits</p> <ul style="list-style-type: none">3.1 Introduction to Sequential Circuits<ul style="list-style-type: none">3.1.1 Difference between combinational and sequential circuits3.1.2 Basic memory elements: Latches and Flip-Flops3.2 Types of Flip-Flops**<ul style="list-style-type: none">3.2.1 SR, D, JK, T flip-flops3.2.2 Triggering mechanisms: edge-triggered and level-triggered3.3 Design of Sequential Circuits**<ul style="list-style-type: none">3.3.1 Counters (synchronous and asynchronous)3.3.2 Shift registers
	<p>Unit 4: Computer Organization Basics</p> <ul style="list-style-type: none">4.1 Introduction to Computer Organization<ul style="list-style-type: none">4.1.1 Structure and components of a computer system4.1.2 Von Neumann architecture4.2 Central Processing Unit (CPU)<ul style="list-style-type: none">4.2.1 CPU organization4.2.2 Instruction set architecture (ISA)4.2.3 Instruction cycle and execution4.3 Memory Hierarchy<ul style="list-style-type: none">- Types of memory: primary vs. secondary- Cache memory: principles and organization
	<p>Unit 5: Input/Output and Storage Systems</p> <ul style="list-style-type: none">5.1. I/O Systems<ul style="list-style-type: none">5.1.1 I/O interface and ports5.1.2 Types of I/O devices5.2 Storage Systems<ul style="list-style-type: none">5.2.1 Hard disk drives (HDDs) and solid-state drives (SSDs)5.2.2 Optical and magnetic storage5.3 Introduction to Buses<ul style="list-style-type: none">5.3.1 Bus architecture and types5.3.2 Data transfer techniques: programmed I/O, interrupt-driven I/O, direct memory access (DMA)

Teaching Methodology	Class Work, Discussion, Lab work, Self-Study, Seminars and/or Assignments
Evaluation Method	50% Internal assessment. 50% External assessment.

Course code: 206
Course Title: Skill Enhancement Course (SEC-02)

Course Code	206
Course Title	Skill Enhancement Course - II (SEC – 02)
Credit	2
Category of Course	Skill Enhancement Course
Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	2 Hrs (Any or Combination of Theory/Practical/Fieldwork/Internship/Project)
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	2022-2023
Implementation Year:	A.Y. 2023-2024
Purpose of Course	<ul style="list-style-type: none"> - As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit Skill Enhancement Course out of the choices given by the college/institute. - It will be mandatory for the student to opt minimum one 2-credit Skill Enhancement Course out of the list of offered courses recognised by the University during semester-1 to semester-5. - The student can start an alternative career in the field by obtaining higher degree of knowledge in the area. - It's aimed at imparting practical skills, embedded internship, hands-on training, soft skills, life skills, such approved online courses etc. to enhance the employability of students. This may also include courses as per the need of new evolving technology.
Course Objective	Obtaining skill in particular field along with the regular curriculum of the selected program is essential. It not only enhance the skill but also provide an opportunity to develop skill in particular area where one can pursue career in future. Skill enhancement provides the opportunity and knowledge for an individual to develop and strengthen the necessary skills to gain, maintain, and advance in a chosen area. Skill enhancement programs are focused around training that combines the best practices from varieties of areas. Skill enhancement or training typically uses a combination of cognitive and behaviour problem solving approaches, both of which are used to strengthen a person's positive skill develop.
Pre-requisite	-
Course outcome	<p>CO1: Student select the area of skill as per his/her interest. The choices will be given by the institute/department.</p> <p>CO2: The student acquire basic and fundamental level of knowledge in the field that the student opted.</p> <p>CO3: Understand the insight of the area and possibility of to explore more in the field.</p> <p>CO4: Understand effective representation of problems in terms addressing the problems.</p> <p>CO5: Learn to upskill and upgrade the knowledge in the area of selected subject.</p>
Course Content and Implementation road-map.	<p>(viii) University has categorized and prepared the basket of the courses including approved online courses that can be offered as Skill Enhancement Course.</p> <p>(ix) The institute/college/department can design and implement skill enhancement course by getting approval from the relevant apex body of the university considering the SOP of the certificate course policies of the University.</p>

	<p>(x) The institutes/college/departments can select more than one course out of the given sets of courses and offer them to their students.</p> <p>(xi) The students can select any of the courses offered by the institute/college/department from the given choices and enrol for the course.</p> <p>(xii) The institute/college/department will arrange appropriate resource person(s) for the course.</p> <p>(xiii) The course evaluation will be taken place at the college/institute/department level based on the nature of the course.</p> <p>(xiv) The institute/college/department will assess the student based on the nature of the course. The student will be granted the credits on successful completion of the course.</p>
Reference Books	<ul style="list-style-type: none"> - The reference materials and books will be decided by the Institutes/Colleges/Departments based on the selected Courses. - Minimum five copies of relevant topics are recommended to keep in the library.
Teaching Methodology	Class Work/ Discussion/ Self-Study/ Seminars/ field works/ practical training/ field work and/or Assignments.
Evaluation Method	<p>50% Internal assessment.</p> <p>50% External assessment.</p> <p>Maximum Marks: 50</p> <p>(Evaluation and Assessment will be carried out at institute level. On successful completion of the course, the student will be granted 2 credits.</p>

Course code: 207
Course Title: Value Addition Course-II (VAC-02)

Course Code	207
Course Title	Value Addition Course - II (VAC – 02)
Credit	2
Category of Course	Value Addition Course
Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	2 Hrs (Any or Combination of Theory/Practical/Fieldwork/Internship/Project)
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	2022-2023
Implementation Year:	A.Y. 2023-2024
Purpose of Course	As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit Value Addition Course out of the choices given by the college/institute. It will be mandatory for the student to opt minimum one 2-credit Value Addition Course out of the list of offered courses recognised by the University during semester-1 to semester-4. The student can start an alternative career in the field by obtaining higher degree of knowledge in the area.
Course Objective	Obtaining knowledge in all or any of the components/fields like (i) Understanding India (ii) Environmental Science/Education (iii) Digital/Technological solutions (iv) Health & Wellness, Yoga education, sports, and fitness are essential for holistic development (v) Indian Knowledge system(IKS). The course components should be among these five categories/fields and as per the Curriculum and Credit Framework for Undergraduate Programmes of the UGC (Page-22 of the document). The purpose is to impart knowledge and understand the necessities of these aspects in life to make the healthy society and nation. It help in development of a dedicated and responsible citizen of the country by adding value to the life.
Pre-requisite	-
Course outcome	CO1: Student select the area of Value addition as per his/her interest. The choices will be given by the institute/department. CO2: The student acquire basic and fundamental level of knowledge in the field that the student opted. CO3: Understand the insight of the area and possibility of to explore more in the field. CO4: Understand effective representation of problems, solutions and insights of the challenges and problems of the peer subject relevant to value addition. CO5: Learn to upskill and upgrade the knowledge in the area of selected subject.
Course Content and Implementation road-map.	(viii) The university has categorised and prepared the list of the courses that can be offered as Value Addition Course. (ix) The institute/college/department can design and implement skill enhancement course by getting approval from the relevant apex body of the university considering the SOP of the certificate course policies of the University. (x) The institutes/college/departments can select more than one course out of the given sets of courses and offer them to their students. (xi) The students can select any of the courses offered by the institute/college/department from the given choices and enrol for the course. (xii) The institute/college/department will arrange appropriate resource person(s) for the course. (xiii) The evaluation will be taken place at the college/institute/department based on the nature of the course.

	(xiv) The institute/college/department will assess the student based on the nature of the course. The student will be granted the credits on successful completion of the course.
Reference Books	<ul style="list-style-type: none"> - The reference materials and books will be decided by the Institutes/Colleges/Departments or as per the university guidelines based on the selected Courses. - Minimum five copies of relevant topics are recommended to keep in the library.
Teaching Methodology	Class Work/ Discussion/ Self-Study/ Seminars/ field works/ practical training/ field work and/or Assignments.
Evaluation Method	<p>50% Internal assessment. 50% External assessment. Maximum Marks: 50 (Evaluation and Assessment will be carried out at institute level. On successful completion of the course, the student will be granted 2 credits.)</p>

Internship: Student willing to exit the program at the end of the two semesters and to avail the Certificate in Computer Application or exit the program at the end of the first four semesters and to avail the Diploma in Computer Application, it is essential to acquire four credits from internship. A key aspect of the internship is induction into actual work situations. Internships involve working with local industry, government or private organizations, business organizations, artists, crafts persons, and similar entities to provide opportunities for students to actively engage in on-site experiential learning. In option to these internships, the student can avail such four credits by availing two 2-credit university approved courses during any of these semesters. The student is required to enroll and avail these 4-credits and produce the evidence in process to opt the multi-level exit option after successfully completion of first year (two semester) or second year(four semesters).

Guidelines for Question paper style

- 1) Ideally each unit of the course should carry equal weightage of marks. However, it will vary upon the content of the units of the course.**
- 2) The objective of the written/theory exams for all courses are to analyze the student's understanding about the course contents, assessing the conceptual knowledge about the course contents and ability to explain the concepts in written forms.**
- 3) As the practical exams are conducted separately and viva-voce is also a part of the practical exam, the concepts and practical knowledge can be analyzed through the practical exams.**
- 4) Since the subjects/courses are technical in nature, the major objective is to evaluate conceptual and technical knowledge for major and minor courses instead of expecting student's ability to write lengthy literature writing skills and abilities.**
- 5) 20% of questions are recommended to ask from objective/short questions types having weightage of 1 to 2 marks per question. Purpose of such question is to analyze precise understanding for the topics/points/concepts.**
- 6) 30% of questions are expected to ask from short questions to answer in few lines having weightage of 3 to 4 marks. Purpose of such questions are to analyze conceptual understanding for the topics/points/concepts that can be describe in short.**
- 7) 50% of questions are expected to ask from long/descriptive/Short-notes questions to answer using charts/graphs/block diagrams/flowcharts/models having weightage of 5 to 7 marks. Purpose of such questions are to analyze the depth knowledge and ability to explain in detail emphasizing technical knowledge.**
- 8) The evaluation by the examiner is expected to evaluate overall technical understanding of the student, ability to express the technical and conceptual knowledge, clarity of thoughts and understanding of the subject and concepts.**
