Veer Narmad South Gujarat University, Surat

Computer Science and I.T. Faculty

Syllabus for (Semester-I and Semester-II)

of

B.Sc.(Computer Application)(Honours)

As per NEP-2020

To be implemented from

Academic Year: June, 2024-2025

(Including Winter Session)

Veer Narmad South Gujarat University, Surat
Bachelor of Computer Application (B.Sc.(C.A.)(Honours))
Under the Faculty of
Computer Science and Information Technology
Framework

Name of Program:	Bachelor of Science in Computer Application (Honours)
Abbreviation:	B.Sc.(C.A.)(Honours): Four-year Integrated Program. With Multi-Level Entry and Exit option
Multi-level Exit Criteria:	i) Under Graduate Certificate in Computer Science and Application: If the student wish to exit after completion of First year (Semester-1 and Semeter-2) without any back-log and secure additional 4 credits from work based skill oriented university approved courses /vocational courses / summer internship / Apprenticeship in addition to 6 credits from skill-based courses earned during first and second semester. ii) Diploma in Computer Science and Application: If the student wish to exit after completion of Second year (Semester-1 to Semeter-4) without any back-log and secure additional 4 credits from work based skill oriented university approved courses /vocational courses / summer internship / Apprenticeship offered at end of first or second year in addition to 6 credits from skill-based courses earned during first four semesters. iii) B.Sc.(C.A.) (Bachelor's of Science in Computer Application): If the student wish to exit after completion of Third year (Semeste-1 to semester-6) without any back-log and secure additional 4 credits from work based skill oriented university approved courses /vocational courses / summer internship / Apprenticeship offered at end of first or second year in addition to 6 credits from skill-based courses earned during first four semesters.
Multi-Level Entry Criteria:	As per the norms of the Veer Narmad South Gujarat University.
Duration:	4 year of B.Sc.(C.A.)(Honors) degree program with multi level exit options at 1st, 2nd and 3rd Year to obtain Certificate, Diploma, Degree and Honours Degree in Computer Application respectively.
Objective of the Program:	BSc (Computer Application) (Honours) is undergraduate degree program in computer application area. Objective of the program is to open a channel of admission for courses in the field of Computer Science, Applications and all relevant fields of information technologies to build career for students who have completed standard 12th (H.S.C.) and are interested in taking computing/computer Application and Information Technology as a career. Main objective is to equip the students with strong foundation in computer programming languages, coding, database handling, software application developments, problem-solving skills and development of analytical and logical skills. The focus is to introduce various programming languages on different platforms and operating systems, interaction with databases available on various platforms, software testing, development and deployment techniques. It also aim to provide knowledge in latest trends and advancements in field of computer technologies.

	The program caters to the needs of the students aspiring to excel in the field of computer science, applications and technologies. The program is designed to develop computer professionals versatile in almost all field of computer application. It also aim to enhance communication and interpersonal skills.
Program Outcome:	**PO1:** Ability to analyze a problem, identify and define the Computing requirements appropriate to its solution. **PO2:** Enhancing the problem solving, logical, reasoning and analysis capabilities of a problem and integrate the ability with the coding using specific computer programming languages. **PO3:** To generate Understanding regarding the core and fundamental ideas about the computer platforms, operating systems, software design concepts, networking concepts and advanced and emerging technologies. **PO4:** Design, implement and evaluate a computer-based system, processing, component or program to meet desired goal with the help of various programming languages, application software, packages, tools, databases on various platforms. **PO5:** An ability to apply design and development principles in construction of software systems of varying complexity using various algorithmic principles, modeling, coding and design of computer-based systems. **PO6:** Prepare the aspiring students to become computer software professionals who can work in corporate/software industry at entry to advanced level as well as independent developers. Overall, the program outcomes aim to produce graduates who are: (a) competent in computer application, development and design. (b) Adapt to changing technology and industry trends. (c) Can make significant contributions to the software applications coding, designing, database managements, testing, deployments and ready to adapt any upcoming technologies.
Program Specific Outcome:	**PSO1:** Developing understanding about the fundamentals of core concepts of logic developments, critical thinking and problem solving capabilities. Emphasis on effective communication. **PSO2:** Improving analytical and applied concepts using various technologies, coding concepts and implementation of coding to solve the problems. **PSO3:** Development of team building concepts and working in team with positive approach, enhancing the mindset to contribute as an individual to the team. Improving interpersonal skills. **PSO4:** Improving student's Understanding related to technical problems and enhancing their capabilities to address the problems to turn into solutions through various possible ways by enhancing critical thinking ability. **PSO5:** Develop students to capabilities for self-learning, skill development through self-practicing and problem solving abilities. **PSO6:** Develop students to address and work on the real-world problems as an individual and as part of team. Understand the business problems and ability to work on their solutions by applying various software technologies. **PSO7:** To enhance development skills at various level including problem analysis, data analysis, logical and critical analysis of the problems and implementing the solutions by imparting various recent and upcoming technologies. **PSO8:** Enhance the passion among the students for updating knowledge, innovative ideas, upskilling and implementing the knowledge in applied areas and research areas

	by understanding the real world problems, addressing the real world problems and their possible solutions that lead to build a successful Professional career.

Medium of Instruction:	English
Eligibility Criteria & Intake:	Candidate must have passed standard 12th (H.S.C.) Examination in Science (Any Group) / General Stream / Vocational Stream from Gujarat Higher Secondary Board (G.H.S.E.B.) or any other equivalent and recognized board (C.B.S.E. / I.C.S.E. etc.). or Diploma from technical Board which must be approved and possess equivalence certificate from Veer Narmad South Gujarat University) with English as one of the subject. In case of candidates passed out from 12th Board from General Stream must have passed with English and anyone of the following subject : (i)Statistics(ii)Economics(iii)Business Mathematics (iv) Accountancy or (v) Computer. Intake : 75 seats per division (Including EWS) Seat Sharing : Group-A: 60% seats based on merit from Science stream (A, B, AB group) and Group-B: 40% seats based on merit from General/vocational/technical board students. (Any of the seats remaining can be transferred to another group) (Seat matrix as per the norms of University).
Semester Fees :	Tuition Fees : Rs. 17,500/- per semester University Exam Fees: Rs.1200/- All other fees including Lab.Utilization Fees, affiliation fees etc. as per B.C.A. program.
Staff requirement:	- One Full time Faculty per year per Division. (3 Full time Faculties per division (One Division include one class each of F.Y.,S.Y.,T.Y.)) (Faculty eligibility criteria as per norms of University. - One Full time Lab. Assistant for one Division.
Infrastructure Requirement;	(i)Two class-rooms with interactive panels and sitting arrangement for 80 students capacity. (ii) Computer Lab. with 40 computers (minimum i5 processor, 500GB SSD, 17" monitor), One server (i7 processor), network and internet ready, Two laser-jet printers and A.C. in lab.

Program Structure	Semester-wise break up for the courses :

SEMESTER – 1

Course Code	**Course Title**	**Course Category**	**Level of Course**	**Course Credits**	**Teaching Hours/week**	
				Th.+Pra.	Theory	Practical/ Fieldwork /Project/ Internship
101	**Communication Skills (AEC-01)** [Modern Indian Language (MIL) & English language focused on language and communication skills.]	Ability Enhancement Course	100-199 Foundation/ Introductory	2	2	0
102	Mathematics (Student will opt any one course of multi-disciplinary nature from other than the computer Science and Application faculty).	Multi-Disciplinary/ Inter-Disciplinary	100-199 Foundation/ Introductory	4	4	0
103	Introduction to Computers	Minor Course	100-199 Foundation/ Introductory	4	4	0
104	Computer Programming and Programming Methodology (CPPM)	Major Course	200-299 Intermediate Level Course	4	2	4
105	Database concepts and Data Queries (DDQ)	Major Course	200-299 Intermediate Level Course	4	2	4
	Practical (Based on Course Code:104 & 105 Equally divided)	No separate credits allocated for practical. The Practical exam/viva-voce will be based on Course 104 and 105				
106	**Skill Enhancement Course-I (SEC-01)** [The student will undergo field training/ internship training OR Select minimum one University approved and recognized 2 credit certificate course from the skill based courses list offered by the respective institute/department.] (The student need to enrol separately and pay the fees as decided by the respective institute/department)	Skill Enhancement Course	100-199 Foundation / Introductory	2	2	
107	**Value Addition Course – I (VAC-01)** [The student will select minimum one University approved and recognized 2 credits certificate course from the Value Addition courses list offered by the respective institute/department.] (The student need to enrol separately and pay the fees as decided by the respective institute/department)	Value Addition Course	100-199 Foundation/ Introductory	2	2	-
Other Activities	The student is expected to participate in activities related to National Service Scheme (NCC), National Cadet Corps (NCC), adult education/literacy initiatives, mentoring school students, Elderly literacy program/ Environment preservation activities and other similar activities.			-	-	-
Total				22	18	08

Course Code	Course Title	Course Credit	University Exam Type	Exam Duration	External Marks	Internal Marks	Total Marks
101	Communication Skills (AEC-01)	2	Theory/ Written	1 Hours	25	25	50
102	Mathematics	4	Theory/ Written	2 Hours	50	50	100
103	Introduction to Computers	4	Theory/ Written	2 Hours	50	50	100
104	Computer Programming and Programming Methodology (CPPM)**	4	Theory/ Written : Practical :	1 Hours 2 Hours	25 25	50 50	100
105	Database concepts and Data Queries (DDQ)**	4	Theory/ Written : Practical :	1 Hours 2 Hours	25 25	25 25	100
106	Skill Enhancement Course-I# (SEC-01)	2	-	-	25	25	50
107	Value Addition Course-I# (VAC-01)	2	-	-	25	25	50
Total		22			275	275	550

For Practical and Project:

- Batch Size – 40 Maximum (Desirable). Maximum 45 students can be accommodated in a batch. Separate batch should be considered if the student strength exceed 45 numbers.
- Practical includes Practical sessions for course-104 and course-105. **Minimum** Eight Practical hours (4 hours for course-104 and 4 hours for course-105) per week should be allocated per batch. Out of which 8 hours will be in supervised mode and balance hours in un-supervised mode.
- The journal must be certified by the concerned faculty and by the Head of the Department, failing which the student will not be allowed to appear for External Practical Examination. Student will submit softcopy of Minor Project duly certified by the internal guide.

Internship: A student who wish to exit after successfully completion of first year (Semester-1 and Semester-2) without any backlog is required to obtain Four credits at the end of the year either through the summer internship or university approved skill based certificate courses(two courses of 2-credits each or one 4-credit course). Student is required to enrol for the certificate courses separately by paying the course fees as decided by the college/institute. For summer training, the Institute/college will grant the permission and evaluate the training outcomes. Based on satisfactory completion of the summer training, the Institute head will recommend to the university to grant four credits for summer training. The Internship/summer training/skill based certificate courses will be an audit course.[The internship cost/fees will be bear by the student.]

Skill Enhancement Course : As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit skill enhancement course out of the choices given by the college/institute (From available basket of courses as per University norms). It will be mandatory for the student to opt minimum one 2-credit Skill enhancement course out of offered courses recognised by University during semester-1 to semester-5.
(The student need to enrol separately and pay the fees as decided by the respective institute/department)

Value Addition Course: As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit Value Addition Course out of the choices given by the college/institute (From available basket of courses as per University norms). It will be mandatory for the student to opt minimum one 2-credit Value Addition Course out of offered courses recognised by the University during semester-1 to semester-4.
(The student need to enrol separately and pay the fees as decided by the respective institute/department)

 # Marks: : The students will enrol for the course from the given university approved list of certificate courses offered by the respective college/department. The student will select and enrol separately for any of the offered list of courses at college/department/institute and obtain respective credits. The institute will evaluate the performance (preferably continuous evolution) as per the SOP of certificate courses and on successfully completion of the course, the student will be eligible to obtain respective credits for the course. These credits will be considered and reflect in student's mark-sheet as well as in ABC(Academic Bank of Credit). The marks obtained for these courses will not considered in calculating the SGPA and CGPA. Moreover, these courses are mandatory and student is required to obtain the specified credits in process to acquire the certificate/diploma/degree.
[The student is required to pay separately for these courses as prescribed by the college. The college will decide the fees for audit courses based on the University norms certificate course per credit fees.]

** Major Practical based Subjects: Course 104 and 105 are major courses. Both these courses are carrying 4 credits (2 Hours of theory and 4 hours of practical per week). Both these subjects carry 100 marks of exam weightage (50 theory and 50 practical). External and Internal distribution of marks are in ratio of 50:50 respectively. Students are required to acquire minimum passing marks from theory and practical collectively. Practical exams for course-104 (2 hours duration) and course-105(2 hours duration) will be conducted on same day.

The internal marks(25 marks each for course-104 and course-105) division of marks are :

Internal Theory: Attendance: 4 marks + Assignments: 09 marks + Unit tests/continuous evaluation: 12 marks

Internal Practical : Attendance: 4 marks + Practical File/Journal: 09 marks + Internal tests/continuous evaluation: 12 marks

External Practical exam marks (25 marks each for course-104 and course-105)

Division of marks are: Exam evaluation: 20 marks + Viva-voce: 5 Marks.

Practical examination will be conducted for course code-104 and course-105 separately on same day.

Students are required to pass in combined head (Theory + Practical) for each course.

Students are required to remain present in internal and external theory and practical exams for course code – 104 and 105 mandatorily.

Program Passing Rules:	As per University rules.
Program Fees : (Per Semester) (One time fees and exam fees are additional as prescribed by the university) (w.e.f. Academic Year : 2024-25)	Semester Tuition Fees : Rs. 17,500/- Semester Laboratory Utilization fees : Rs. 1,500/- [Other one time /affiliation fees, will be as per the norms of the University] [The fees for all certificate courses, Skill Enhancement Courses and Value Addition Courses; fees will be as per the prescribed limit for per credit as per the SOP of certificate courses decided by the university.]

SEMESTER – 2

Course Code	Course Title	Course Category	Level of Course	Course Credits	Teaching per week	
					Theory	Practical/ Fieldwork/Project/ Internship

For Practical and Project:

- Batch Size – 40 Maximum (Desirable). Maximum 45 students can be accommodated in a batch. Separate batch should be considered if the student strength exceed 45 numbers.
- Practical includes Practical sessions for course-204 and course-205. **Minimum** Eight Practical hours(4 hours for course-204 and 4 hours for course-205) per week should be allocated per batch. Out of which 8 hours will be in supervised mode and balance hours in un-supervised mode.
- The journal should be certified by the concerned faculty and by the Head of the Department, failing which the student should not be allowed to appear for External Practical Examination. Student will submit softcopy of Minor Project duly certified by the internal guide.

Major Course : Major discipline is the main focus (Core) dominant subject and the degree will be awarded in that discipline. Students must secure a prescribed number of credits (50% of total credits) through core courses in the major discipline. Students can choose the courses from the pool of courses. The number of courses (subjects) in Major may vary from semester to semester.

Minor Course : Minor discipline is the broader understanding course beyond the major discipline course. It contains generic-electives for students to choose from the pool of courses. It helps students to gain broader knowledge in addition to relevant major disciplines courses as per their choices. Minor subjects may be from same or different disciplines. Student may make choices according to their interest/need, from ODL courses also.

Interdisciplinary/Multidisciplinary/Allied Courses: This is constituent discipline of the major courses and it helps learners to acquire core competence in relevant or any other independent courses of their choices. This course may be major specific or other discipline specific. Learner shall have option to choose the course from available basket of approved courses provided by the university or from any other institutions as the learner's choice. The Credit allocated for these courses is 12 credits of total credits for 3 years' bachelor's degree and four years' bachelor's degree programme.

Internship: A student who wish to exit after successfully completion of first year (Semester-1 and Semester-2) without any backlog is required to obtain Four credits at the end of the year either through the summer internship or university approved skill based certificate courses(two courses of 2-credits each or one 4-credit course). Student is required to enrol for the certificate courses separately by paying the course fees as decided by the college/institute. For summer training, the Institute/college will grant the permission and evaluate the training outcomes. Based on satisfactory completion of the summer training, the Institute head will recommend to the university to grant four credits for summer training. The Internship/summer training/skill based certificate courses will be an audit course.[The internship cost/fees will be bear by the student.]

Ability Enhancement Course (AEC): To offer the students to achieve competency in a Modern Indian Language and English Language focused on language and communication skills. It may be a major specific course. The Credit allocated for these courses is 10 credits of total credits for 3 years' bachelor's degree and four years' bachelor's degree programme. The courses can be selected by the college/institute from available basket of approved 2-credit certificate courses provided by the university.

Skill Enhancement Course : As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit skill enhancement course out of the choices given by the college/institute (From available basket of courses as per University norms). It will be mandatory for the student to opt minimum one 2-credit Skill enhancement course out of offered courses recognised by University during semester-1 to semester-5.
(The student need to enrol separately and pay the fees as decided by the respective institute/department)

Value Addition Course: As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit Value Addition Course out of the choices given by the college/institute (From available basket of courses as per University norms). It will be mandatory for the student to opt minimum one 2-credit Value Addition Course out of offered courses recognised by the University during semester-1 to semester-4.
(The student need to enrol separately and pay the fees as decided by the respective institute/department)

 # Marks: : The students will enrol for the course from the given university approved list of certificate courses offered by the respective college/department. The student will select and enrol separately for any of the offered list of courses at college/department/institute and obtain respective credits. The institute will evaluate the performance (preferably continuous evolution) as per the SOP of certificate courses and on successfully completion of the course, the student will be eligible to obtain respective credits for the course. These credits will be considered and reflect in student's mark-sheet as well as in ABC(Academic Bank of Credit). The marks obtained for these courses will not considered in calculating the SGPA and CGPA. Moreover, these courses are mandatory and student is required to obtain the specified credits in process to acquire the certificate/diploma/degree.
[The student is required to pay separately for these courses as prescribed by the college. The college will decide the fees for audit courses based on the University norms certificate course per credit fees.]

**** Major Practical based Subjects:** Course 204 and 205 are major courses. Both these courses are carrying 4 credits (2 Hours of theory and 4 hours of practical per week). Both these subjects carry 100 marks of exam weightage (50 theory and 50 practical). External and Internal distribution of marks are in ratio of 70:30 respectively. Students are required to acquire minimum passing marks from theory and practical collectively. Practical exams for course-204 (2 hours duration) and course-205(2 hours duration) will be conducted on same day.
The internal marks(25 marks each for course-204 and course-205) division of marks are :
Internal Theory: Attendance: 4 marks + Assignments: 09 marks + Unit tests/continuous evaluation: 12 marks
Internal Practical : Attendance: 4 marks + Practical File/Journal: 09 marks + Internal tests/continuous evaluation: 12 marks
External Practical exam marks (25 marks each for course-204 and course-205)
Division of marks are: Exam evaluation: 20 marks + Viva-voce: 5 Marks.
Practical examination will be conducted for course code-204 and course-205 separately on same day.
Students are required to pass in combined head (Theory + Practical) for each course.
Students are required to remain present in internal and external theory and practical exams for course code – 204 and 205 mandatorily.

Program Passing Rules:	As per University rules.
Program Fees : (Per Semester) (One time fees and exam fees are additional as prescribed by the university) (w.e.f. Academic Year : 2024-25)	Semester Tuition Fees : As per the norms of University Semester Laboratory Utilization fees : Rs. 1,500/- [Other one time /affiliation /exam fees, will be as per the norms of the University] [For all certificate course fees, Skill Enhancement Courses and Value Addition Courses fees will be as per the prescribed limit for per credit as per the SOP of certificate courses decided by the university.]

Semester - 1

Course Code: 101

Course Title: COMMUNICATION SKILLS

Course Code	101
Course Title	Communication Skills [Title of the course will be the one selected by the student from courses offered by college/institute out of the course basket offered by the University under the Ability Enhancement courses (AEC) basket.]
Credits	2
Course Category	Ability Enhancement Course (AEC-01) [Modern Indian Language (MIL) & English language focused on language and communication skills.]
Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	2 Hrs
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	Effective communication is vital for the success in various situations. This course will help students develop and improve English Communication skills. To be offered to students to achieve competency in a Modern Indian Language and English Language focused on language and communication skills. The course will be selected by the institute from basket of courses under category AEC (Ability Enhancement Course) offered by the university. [Modern Indian Language (MIL) & English language focused on language and communication skills.]
Course Objective	The course aim at enabling the students to acquire and demonstrate the core linguistic skills, including critical reading and expository and academic writing skills that help students articulate their arguments and present their thinking clearly and coherently and recognize the importance of language as a mediator of knowledge and identity. They would also enable students to acquaint themselves with the cultural and intellectual heritage of the chosen MIL and English language, as well as to provide a reflective understanding of the structure and complexity of the language/literature related to both the MIL and English language. The courses will also emphasize the development and enhancement of skills such as communication, and the ability to participate/conduct discussion and debate.
Pre-requisite	Knowledge of English at H.Sc.(12^{th}) Level
Course Outcomes	CO1 : To make students understand the importance of effective communication skills in personal and professional life. CO2 : student's will be able to enhance their ability in reading ,writing ,listening and speaking as per the demand of corporate world. CO3 : To develop students individual as well as team work efficiency CO4; To enhance the inquisitiveness in students for updating knowledge to solve problems, and lead to build a successful professional career. CO5; Students will be able to understand the importance of digital communication.

	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6	PSO 7	PSO 8
CO1	■				■			
CO2	■			■	■		■	■
CO3			■					
C04	■	■		■		■		
CO5	■	■		■	■			

Course Outcome

After studying the course, students will be able to Implement their skills at their workplace on varied roles such as computeroperator and programmer.

Course Content

Unit : 1 : Fundamentals of Communication

1.1 Definition and Meaning, Overview
1.2 Process of Communication
1.3 Features and Process of Professional communication
1.4 Role of creative and critical thinking in communication
1.5 Different forms of communication
1.6 Communication Network in an Organization
1.7 Barriers to communication

Unit : 2 :Developing Listening skills

2.1 Listening Vs Hearing
2.2 Effective Listening
2.3 Process of Listening
2.4 Types of Listening
2.5 Barriers to effective listening

Unit : 3 : Speaking Skills

3.1 Non-verbal Communication
3.2 Group –discussions- Conducting G.D on given topics(Oral Practical)
3.3 Dynamics of Professional presentation/Drafting Presentation on given topics
3.4 Public speaking
3.5 Conversations and Dialogue writing

Unit : 4 Reading Skills

4.1 Need for Developing Efficient Reading
4.2 Benefits of Effective Reading
4.3 Basic steps To Effective Reading
4.4 Types of Reading
4.5 Reading Comprehension

Unit : 5 Writing Skills

5.1 Resume writing
5.2 The art of Condensation
5.3 Business Reports
5.4 E-mail writing
5.5 Blog Writing.

5. Communication in English – R. P. Bhatnagar & R. T. Bell – Orient Longman
6. Good English – G. H. Vallins – Rups & Co
7. Let's talk English – M. I. Joshi

	8. Essentials of Business Communications – Pat & Sons, S. Chand
Teaching Methodology	Class Work, Discussion, Self-Study, Seminars and/or Assignments
Evaluation Method	50% Internal assessment. 50% External assessment.

Course Code: 102
Course Title: MATHEMATICS

Course Code	102
Course Title	Mathematics (Multi-Disciplinary Course – 01) [Title of the course will be the one selected by the student from courses offered by college/institute out of the course basket offered by the University under the Multi-Disciplinary courses or Inter-disciplinary courses.]
Credits	4
Course Category	Multidisciplinary Course (MC-01)
Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	4 Hrs.
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	To impart fundamental knowledge and develop mathematical abilities relevant to applications relevant to Computer Applications. [Student will opt any one course of multi-disciplinary nature from other than the computer Science and Application faculty. The course will be offered by the institute/college passed by the Board of Studies of University faculties other than the computer science and application faculty.]
Course Objective	To Provide a foundation in mathematical concepts and methods that are relevant to Computer Applications and develop the ability to apply mathematical knowledge and techniques to solve problems in computing.
Pre-requisite	Knowledge of Fundamentals of Mathematics of 10th Grade Level
Course Outcomes	**CO1:** Define and explain the fundamental concepts of Mathematical Abilities in organizations. **CO2:** Students can apply set theory concepts to real-world scenario, such as analyzing survey data. **CO3:** Enhance student's logical reasoning to solve problems in various contexts, such as puzzles or legal arguments by learning Truth table. **CO4:** Course aims to equip students with the knowledge and skills to define and operate matrices, compute solutions to business problems through the use of mathematical concepts and techniques. **CO5:** Course aims to develop students' ability to think logically and critically, as well as to apply mathematical concepts and techniques to real-world problems. **CO6:** Develop independent learning skills, including the ability to research and explore mathematical concept.
Mapping between Course Outcomes(CO) with Program Specific Outcomes(PSO)	Course Outcome	After studying the course, students will be able to Implement acquired skills in writing codes using programming languages.

Course Content	**Unit 1. Set Theory** 1.1.Introduction 1.2.Representation 1.3.Operation and its properties 1.4.Venn Diagram 1.5.Cartesian product and graph **Unit 2. Functions** 2.1.Definition 2.2.Types – Domain and Range 2.3.Construction and functions **Unit 3. Mathematical Logic** 3.1.Introduction to logic 3.2.Truth Table **Unit 4. Boolean Algebra** 4.1Definition & Examples of Boolean Algebra 4.2Boolean Functions 4.3Representation and minimization of Boolean Functions 4.4Design example using Boolean algebra **Unit 5. Matrices and Determinants** 5.1.Matrices of order M * N 5.2.Row and Column transformation 5.3.Addition, Subtraction and multiplication of Matrices 5.4.Computation of Inverse 5.5.Cramer's Rule 5.6.Business Application of Matrices
Reference Books	1. Co-ordinate Geometry – Shanti Narayan 2. Linear Algebra – SushomaVerma 3. Advanced Mathematics – B.S. Shah & Co. 4. Schaum's Outline of Boolean algebra and switching circuits – Elliot Mendelson 5. Digital Computer Fundamentals - Tata McGraw Hill, 6th Edition, Thomas C. Bartee 6. Business Mathematics - QaziZameeruddin, V. K. Khanna and S. K. Bhambri, Vikas Publishing House Pvt. Ltd.
Teaching Methodology	Class Work, Discussion, Self-Study, Seminars and/or Assignments
Evaluation Method	50% Internal assessment. 50% External assessment.

Course Code: 103
Course Title: Introduction to Computers

Course Code	103
Course Title	Introduction to Computers
Credits	4
Course Category	Minor Course
Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	4 Hrs.
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	- Concepts and types of computer and various hardware technologies relevant to computer as well as some important peripherals will be covered. - Introduction of computer internal memories, number systems and conversions from decimal to binary. - Exposure of various input and output devices as well as concepts of Internet and relevant gadgets and their application
Course Objective	to provide knowledge of functional units, number System, Devices and memory & its storage.
Pre-requisite	-
Course Outcomes	**CO1:** Students will be able to develop interest in using computers for professional work. **CO2:** Students will be able to learn functional units of computers, how they process information with other computing systems and devices. **CO3:** Students will be able to understand basic computer hardware components. **CO4:** Students will be able to express the major concepts of Application software and System Software. **CO5:** Student will be able to learn how the computer represents and stores information using binary number system, and will be able to convert between binary and decimal number system. **CO6:** Students will be able to understand the functions of input output devices, know the different types of I/O Devices, and assess new technology used for I/O devices. **CO7:** Students will be able to understand types of internet services, internet connections, and also able to learn the concept of cloud applications, essential web browser technologies.
Mapping between Course Outcomes(CO) with Program Outcomes(PSO)	

	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6	PSO7	PSO8
CO1	■	■

CO3					■	■	■	
CO4			■	■	■	■	■	
CO5		■		■	■			
CO6						■	■	■
CO7				■	■	■	■	■

Course Outcome	On completion of this course, students will get knowledge about functional units, number System, devices and memory and storage.
Course Content	**UNIT-1: Introduction** 1.1 Introduction of Computer 1.2 Applications of Computer 1.3 Types of Computers – Super Computers, Mainframes, Mini Computers, Micro computers(Desktop, Laptop, Notebook, Tablet, Smart Phones) 1.4 Block Diagram and functional units of computer **UNIT-2: Basic Computer Architecture** 2.1 Concepts of Address Bus and Data Bus 2.2 Concept of virtual memory and cache memory 2.3. Hardware Components 2.3.1. Motherboard 2.3.2. Types of Processor (CPU and GPU) 2.3.3. Understanding processor speed 2.3.4. Memory – RAM(SRAM,DRAM, SDRAM), ROM, EPROM, EEPROM 2.3.5. Storage Devices – Hard Disk, CD, DVD, USB flash memory 2.4. Introduction to Software 2.4.1. Purpose and significance of Operating System 2.4.2. Concept of System Software and Application Software **UNIT-3: Number System** 3.1. Introduction of Decimal, Binary, Octal and Hexadecimal number Systems. 3.2 Conversion of Decimal to Binary and Binary to Decimal 3.3 Binary addition & subtraction 3.4 ASCII and ANSI character code **Unit – 4: Input & Output Devices** 4.1. Introduction of Input Devices 4.1.1. Pointing Devices – Mouse, Trackball, Joystick, Touch Screen, Light Pen 4.1.2. Keyboard 4.1.3. RFID concepts and application in FastTag 4.2. Introduction and purpose of Scanning Devices 4.2.1. Optical Scanner 4.2.2. Bar Code Reader 4.2.3. Web Camera 4.3. Introduction and comparisons of Output Devices 4.3.1. Monitors – LED, LCD,TFT, OLED, TouchScreen Monitor 4.3.2. Printers – Dot Matrix Printer, Laser Printer, Inkjet Printer **Unit - 5: Concepts of Internet** 5.1. Concepts of Internet and WWW 5.1.1 Types of Internet Services 5.1.2 Hardware – Modem, Router, Blue tooth, Fire-Stick 5.1.3 Internet connections using Hotspot, WiFi, cable 5.2 Introduction of Cloud 5.2.1 Concepts of cloud 5.2.2 Purpose and application of Cloud (Example of GoogleDoc) 5.2.3 Concepts of Online Data Backup 5.3 Introduction of Web Browser and relevant terminologies : 5.3.1 URL, Address bar, Domain, Links, Navigation Buttons 5.3.2 Tabbed browsing, Bookmarks, History
Reference Books	1. How computer work: Ron White – Tech media 2. Introduction to computers: 4th Edition – Peter Norton 3. Fundamentals of Computers: V. Rajaraman 4. Computer Fundamentals: Pradeep K. Sinha & Priti Sinha (BPB) 5. Introduction to Networking RechardMcMohan Tata McGraw Hill Publication 6. HTML Black Book – Steven Holzner – Dreamtech Press

	7. Computer Network Fundamentals and application – R S Rajesh Vikas Publication 8. HTML for the World Wide Web, Fifth Edition, with XHTML and CSS- Peachpit Press

Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	- Computer programming is a process that leads from an original formulation of a computing problem to executable computer programs. - Programming involves activities such as analysis, developing, understanding, generating algorithms, verification of requirements of algorithms including their correctness, and implementation (commonly referred to as coding) of algorithms in a target programming language. - To emphasis on concepts of Compiler based programming language, structure of code, algorithms, flow-charts, problem solving attitude, concepts of variables and declaration mechanism of different datatypes, simple I/O statements, conditional statements, loops, compound iterations, strings and certain inbuilt functions, header files, concepts of arrays and one dimensional numeric array operations, numeric inbuilt functions and concepts of pointers
Course Objective	To introduce students the essentials of computer Programming and programming methodology using C Programming language.
Pre-requisite	-
Course Outcomes	CO1: Students will be able to learn advanced programming concept of compiler based programming language. CO2: Students will be proficient working on conditional statements, iterative Statements and fundamentals of programming concepts using C. CO3: Students will be able to represent compound data using arrays in C programs. CO4: Students will be able to develop basic application. CO5: Students will learn important libraries of C programming Language.

Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	Understand concepts of Data and storage of data. This course is aimed to impart knowledge about storing data, concepts of database, retrieval of data and manipulation of data. It is aimed to cover effective storage of data, statistical analysis of data and graphical presentation of data. It also covers concepts of database and fundamental of query languages to insert, access, and manipulate data. This course is not spreadsheet or database specific. The course is not software specific. Any open source software can be used for practical.
Course Objective	To learn and obtain the skills related to i) Concepts of data, data storage and statistical manipulation of data. ii) Introduction of data and data handling using SQL. iii) Concepts of database, storage and manipulation of data using query language.
Pre-requisite	Basics of Data
Course Outcomes	**CO1:** Students will learn the concept of data and storage of data **CO2:** Learn the Concept of Spreadsheet, Using the spreadsheet students will able to learn data manipulation, Statistical analysis of data and graphical presentation of data. **CO3:** Learn the concept of database and data storage in database **CO4:** To understand the concept of data storage through the concept of fundamental of query language by learning DDL and DML Statements. **CO5:** To Learn the concept of Queries to manipulate data and handling of database using SQL.

CO5		■		■	■	■	■	■

Course Content

UNIT-1: Concepts of Database: (Max.Weightage: 25%)

1.1 Introduction to Databases
- 1.1.1 Concepts of Database
- 1.1.2 Definition and importance of databases

1.2 Database characteristics:
- 1.2.1 Data Independence (Logical and Physical)
- 1.2.2 Components of Database (User, Application , DBMS, Database)
- 1.2.3 Database Architecture (1-tier, 2-tier, 3-tier)
  - 1.2.3.1 Comparison, advantages and disadvantages.

1.3 Database Models (Hierarchical, Network, E/R, Relational)
- 1.3.1 E/R model : Entity, Relationship, Attribute
- 1.3.2 E/R Diagram : One to one, one to many , many to one, many to many

1.3.3 Strong entity, weak entity
1.3.4 key attribute, derived attribute, Multi-valued attribute

UNIT-2: Evolution of Database: (Max.Weightage: 15%)

2.1 Types of databases: Relational, NoSQL, Object-oriented, etc.
2.2 Evolution of Databases:
2.2.1 Overview of database systems from flat files to modern DBMS
2.3 Database Management Systems (DBMS)
2.3.1 Introduction to DBMS
2.3.2 Purpose and functions of DBMS
2.3.3 Advantages and disadvantages of using DBMS
2.4 Components of DBMS:
2.4.1 Data definition language (DDL),
2.4.2 Data manipulation language (DML)
2.4.3 Data control language (DCL)

Unit-3: Database types and Types of Keys (Max weightage : 15%)

3.1 Types of Database Systems
3.1.1 Relational Database Management System (RDBMS)
3.1.1.1 Features and advantages
3.1.1.2 Structured Query Language (SQL) and its role
3.1.1.3 Advantages and Dis-Advantages of RDBMS
3.2 NoSQL Databases
3.2.1 Characteristics and types (Document stores, Key-value stores, Graph databases)
3.2.2 Advantages of NoSQL Databases :
- Scalability, flexibility in schema design, performance for large-scale data
3.2.3 Comparison with RDBMS
3.3 Object-Oriented Databases
3.3.1 Object-oriented model and its advantages
3.3.2 Advantages of Object-oriented model
3.4 Concepts of Keys :
3.4.1 Candidate key, unique key, Super key, Composite key
3.4.2 Primary Key, Foreign key (Definition, purpose, and constraints)
3.4.3 Choosing the right primary key
3.4.3 concepts of Referential integrity

UNIT-4: Normalization and Concepts of SQL: (Max.Weightage: 25%)

4.1 Why normalization (Insertion, Updating, Deletion anomalies)
4.2 Normalization Rules:
4.2.1 Concepts of Dependency, Transitive Dependency
4.2.2 Armstrong Axioms
4.2.3 1st Normal Form, 2nd Normal Form, 3rd Normal Form, B.C.N.F.
4.3 Concepts of Structure Query Language (SQL)
4.3.1 SQL datatypes : int, float, double, char, varchar, number, varchar2, Text, date
4.4 DDL Statements :
4.4.1 Create , Drop, Truncate, Rename, Alter
4.5 DML and DQL(Data Query Language) Statements :
4.5.1 Insert, Update, Delete
4.5.2 select

UNIT-5: Queries (Single Table only) (Max.Weightage: 20%)

5.1 Using where clause and operators with where clause:

	5.1.1 In, between , like, not in, =, !=, >, =, <=, wildcard operators 5.1.2 Order by, Group by, Distinct 5.1.3 AND, OR operators, Exists and not Exists 5.1.4 Use of Alias 5.2 Constraints (Table level and Attribute Level) 5.2.1 NOT NULL, CHECK, DEFAULT 5.2.2 UNIQUE, Primary Key, Foreign Key 5.2.3 On Delete Cascade 5.3 SQL Functions : 5.3.1 Aggregate Functions: avg(), max(), min(), sum(), count(), first(), last(). 5.3.2 Scalar Functions: ucase(), lcase(), round(), mid(). 5.4 Creating sequence 5.5 Views : 5.5.1 Creating simple view, updating view, dropping view. 5.5.2 Difference between View and Table.

Evaluation Method	50% Internal assessment. 50% External assessment.

Course code: 106
Course Title: Skill Enhancement Course (SEC-01)

Course Code	106
Course Title	Skill Enhancement Course - I (SEC – 01)
Credit	2
Category of Course	Skill Enhancement Course
Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	2 Hrs (Any or Combination of Theory/Practical/Fieldwork/Internship/Project)
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	- As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit Skill Enhancement Course out of the choices given by the college/institute. - It will be mandatory for the student to opt minimum one 2-credit Skill Enhancement Course out of the list of offered courses recognised by the University during semester-1 to semester-5. - The student can start an alternative career in the field by obtaining higher degree of knowledge in the area. - It's aimed at imparting practical skills, embedded internship, hands-on training, soft skills, life skills, such approved online courses etc. to enhance the employability of students. This may also include courses as per the need of new evolving technology.
Course Objective	Obtaining skill in particular field along with the regular curriculum of the selected program is essential. It not only enhance the skill but also provide an opportunity to develop skill in particular area where one can pursue career in future. Skill enhancement provides the opportunity and knowledge for an individual to develop and strengthen the necessary skills to gain, maintain, and advance in a chosen area. Skill enhancement programs are focused around training that combines the best practices from varieties of areas. Skill enhancement or training typically uses a combination of cognitive and behaviour problem solving approaches, both of which are used to strengthen a person's positive skill develop.
Pre-requisite	-
Course outcome	CO1: Student select the area of skill as per his/her interest. The choices will be given by the institute/department. CO2: The student acquire basic and fundamental level of knowledge in the field that the student opted. CO3: Understand the insight of the area and possibility of to explore more in the field. CO4: Understand effective representation of problems in terms addressing the problems. CO5: Learn to upskill and upgrade the knowledge in the area of selected subject.
Course Content and Implementation road-map.	(i) University has categorised and prepared the basket of the courses including approved online courses that can be offered as Skill Enhancement Course. (ii) The institute/college/department can design and implement skill enhancement course by getting approval from the relevant apex body of the university considering the SOP of the certificate course policies of the University. (iii) The institutes/college/departments can select more than one course out of the given sets of courses and offer them to their students.

	(iv) The students can select any of the courses offered by the institute/college/department from the given choices and enrol for the course. (v) The institute/college/department will arrange appropriate resource person(s) for the course. (vi) The course evaluation will be taken place at the college/institute/department level based on the nature of the course. (vii) The institute/college/department will assess the student based on the nature of the course. The student will be granted the credits on successful completion of the course.
Reference Books	- The reference materials and books will be decided by the Institutes/Colleges/Departments based on the selected Courses. - Minimum five copies of relevant topics are recommended to keep in the library.
Teaching Methodology	Class Work/ Discussion/ Self-Study/ Seminars/ field works/ practical training/ field work and/or Assignments.
Evaluation Method	50% Internal assessment. 50% External assessment. Maximum Marks: 50 (Evaluation and Assessment will be carried out at institute level. On successful completion of the course, the student will be granted 2 credits.)

Course code: 107
Course Title: Value Addition Course-I (VAC-01)

Course Code	107
Course Title	Value Addition Course - I (VAC – 01)
Credit	2
Category of Course	Value Addition Course
Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	2 Hrs (Any or Combination of Theory/Practical/Fieldwork/Internship/Project)
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit Value Addition Course out of the choices given by the college/institute. It will be mandatory for the student to opt minimum one 2-credit Value Addition Course out of the list of offered courses recognised by the University during semester-1 to semester-4. The student can start an alternative career in the field by obtaining higher degree of knowledge in the area.
Course Objective	Obtaining knowledge in all or any of the components/fields like (i) Understanding India (ii) Environmental Science/Education (iii) Digital/Technological solutions (iv) Health & Wellness, Yoga education, sports, and fitness are essential for holistic development (v) Indian Knowledge system(IKS). The course components should be among these five categories/fields and as per the Curriculum and Credit Framework for Undergraduate Programmes of the UGC (Page-22 of the document). The purpose is to impart knowledge and understand the necessities of these aspects in life to make the healthy society and nation. It help in development of a dedicated and responsible citizen of the country by adding value to the life.
Pre-requisite	-
Course outcome	CO1: Student select the area of Value addition as per his/her interest. The choices will be given by the institute/department. CO2: The student acquire basic and fundamental level of knowledge in the field that the student opted. CO3: Understand the insight of the area and possibility of to explore more in the field. CO4: Understand effective representation of problems, solutions and insights of the challenges and problems of the peer subject relevant to value addition. CO5: Learn to upskill and upgrade the knowledge in the area of selected subject.
Course Content and Implementation road-map.	(i) The university has categorised and prepared the list of the courses that can be offered as Value Addition Course. (ii) The institute/college/department can design and implement skill enhancement course by getting approval from the relevant apex body of the university considering the SOP of the certificate course policies of the University. (iii) The institutes/college/departments can select more than one course out of the given sets of courses and offer them to their students. (iv) The students can select any of the courses offered by the institute/college/department from the given choices and enrol for the course. (v) The institute/college/department will arrange appropriate resource person(s) for the course. (vi) The evaluation will be taken place at the college/institute/department based on the nature of the course.

	(vii) The institute/college/department will assess the student based on the nature of the course. The student will be granted the credits on successful completion of the course.
Reference Books	- The reference materials and books will be decided by the Institutes/Colleges/Departments or as per the university guidelines based on the selected Courses. - Minimum five copies of relevant topics are recommended to keep in the library.
Teaching Methodology	Class Work/ Discussion/ Self-Study/ Seminars/ field works/ practical training/ field work and/or Assignments.
Evaluation Method	50% Internal assessment. 50% External assessment. Maximum Marks: 50 (Evaluation and Assessment will be carried out at institute level. On successful completion of the course, the student will be granted 2 credits.)

Internship: Student willing to exit the program at the end of the two semesters and to avail the Certificate in Computer Application or exit the program at the end of the first four semesters and to avail the Diploma in Computer Application, it is essential to acquire four credits from internship. A key aspect of the internship is induction into actual work situations. Internships involve working with local industry, government or private organizations, business organizations, artists, crafts persons, and similar entities to provide opportunities for students to actively engage in on-site experiential learning. In option to these internships, the student can avail such four credits by availing two 2-credit university approved courses during any of these semesters. The student is required to enroll and avail these 4-credits and produce the evidence in process to opt the multi-level exit option after successfully completion of first year (two semester) or second year(four semesters).

Semester - 2

Course Code: 201

Course Title: Ability Enhancement Course-02

Course Code	201
Course Title	Ability Enhancement Course – 02 [Title of the course will be the one selected by the student from courses offered by college/institute out of the course basket offered by the University under the Ability Enhancement courses
Credits	2
Course Category	Ability Enhancement Course (AEC-02)
Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	2 Hrs
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	To be offered to students to achieve competency in a Modern Indian Language and English Language focused on language and communication skills. This will be an elective course. Can be selected from the list of elective options available under the basket of Ability Enhancement certificate Courses offered by the University.
Course Objective	The course aim at enabling the students to acquire and demonstrate the core linguistic skills, including critical reading and expository and academic writing skills that help students articulate their arguments and present their thinking clearly and coherently and recognize the importance of language as a mediator of knowledge and identity. They would also enable students to acquaint themselves with the cultural and intellectual heritage of the chosen MIL and English language, as well as to provide a reflective understanding of the structure and complexity of the language/literature related to both the MIL and English language. The courses will also emphasize the development and enhancement of skills such as communication, and the ability to participate/conduct discussion and debate.
Pre-requisite	Knowledge of English at H.Sc.(12^{th}) Level
Course Outcomes	The list of Electives are showing individual course's Course Outcomes.
Mapping between Course Outcomes(CO) with Program Specific Outcomes(PSO)	The list of Ability Enhancement Elective courses are showing mapping between Course Outcomes(CO) with Program Specific Outcomes (PSO) for individual courses.
Course Content	The list of Electives are showing individual course's Course Contents.
Reference Books	- The list of reference books will be decided by the Institutes/Colleges/Departments or as per the university guidelines based on the selected Courses. - Minimum five copies of five different titles relevant topics are recommended to keep in the library. Electives are showing individual course's reference books.
Teaching Methodology	Class Work, Discussion, Self-Study, Seminars and/or Assignments
Evaluation Method	50% Internal assessment. 50% External assessment.

Course Code: 202-01
Course Title: Computerized Financial Accounting

Course Code	202-01
Course Title	Computerized Financial Accounting [Title of the course will be the one selected by the student from courses offered by college/institute out of the course basket offered by the University under the Multi-Disciplinary courses or Inter-disciplinary courses.]
Credit	4
Course Category	Multi Disciplinary Course – 02
Level of Course	100-199 (Foundation / Introductory)
Teaching Per Week	4 Hours
Review/Revision	-
Implementation Year	A.Y.2024-25
Minimum weeks per Semester	15 (Including Classwork, examination, preparation, holidays etc.)
Purpose of Course	- To impart knowledge about accounting and how the accounts can be maintained using computer software. - This will give an idea to understand the Financial accounting terminologies and the model which is computerized. - [This is constituent discipline of the major courses and it helps learners to acquire core competence in relevant or any other independent courses of their choices. This course may be major specific or other discipline specific. Learner shall have option to choose the course from available pool of courses or from any other institutions as the learner's choice. - Interdisciplinary course can help to gain the skills needed to adapt to a rapidly changing workplace, combining theory with practice to help students develop valuable transferable skills. - Multi-disciplinary course allows the students to understand the power of new ideas. It helps them to develop a pragmatic attitude by allowing them to decide what subjects they will opt for and what could be their possible benefits. They get time to make a decision by calculating the risks & advantages. - Student can opt any one course of multi-disciplinary nature from other than the computer Science and Application faculty. The course will be offered by the institute/college passed by the Board of Studies of University faculties other than the computer science and application faculty.]
Course Objective	The course will give fundamental ideas about the accounting software and as a course study, the students can understand how the accounting software works. It also give an idea about various terminologies related to the computerized financial accounting. - Integration of Knowledge and Skills: One objective of a multidisciplinary course is to foster the integration of knowledge and skills from different disciplines. By combining various areas of study, students can gain a holistic understanding of a particular topic or problem. This objective aims to break down the traditional boundaries between subjects and encourage students to see connections and relationships across different fields. - Promoting Critical Thinking and Problem Solving: Another objective is to enhance students' critical thinking and problem-solving abilities. Multidisciplinary courses often involve complex real-world issues that require a multifaceted approach. By engaging with diverse perspectives

and methodologies, students develop the capacity to analyze problems from multiple angles, think creatively, and propose innovative solutions.

- Enhancing Collaboration and Communication Skills: Collaboration and effective communication are essential skills in today's interconnected world. Multidisciplinary courses aim to cultivate these skills by providing opportunities for students to work collaboratively with peers from different disciplines. Through group projects, discussions, and presentations, students learn how to articulate their ideas, listen actively to others, and collaborate effectively to achieve common goals. This objective prepares students for interdisciplinary work environments and encourages the exchange of ideas across disciplinary boundaries.

Course Outcome

CO1- After learning this subject student will be able to know the basic concepts of Financial Accounting & use of a good Financial Accounting Software
CO2- student will able to learn basic about financial accounting and its concepts
CO3- students will able to learn about transaction and types of accounts
CO4- student will able to learn the book-keeping concept
CO5- student will able to know about the journal and other related details
CO6- student will learn about the ledger and trail balance

Course Content

Unit 1: Introduction to Accounting System
1.1 Meaning & Definition of Accounting
1.2 Objectives of Accounting
1.3 Concepts and Features of Book Keeping
1.4 Branches of Accounting (Financial Management, Cust)
1.5 Basis of Accounting (Accrual Bases, Cash Bases)
1.6 Accounting Concepts

Unit 2: Accounting Equation & Transaction Analysis
2.1 Introduction to Assets, Liabilities, Equities
2.2 Concepts of Transaction Analysis
2.3 Classification of Accounts (Real Account, Personal Account, Nominal Account)

Unit 3: Concepts of Book-Keeping
3.1 Introduction of Single Entry System and advantages/disadvantages
3.2 Introduction of Double Entry System and its advantages
3.3 Types of Business Transaction
3.4 Concepts of important Terminologies : Opening Stock, Closing Stock, Goods, Inventory, Assets, Liabilities, Capital, Debit, Debtors, Creditors, Income, Expenses, Loss, Profit, Credit, Debit.

Unit 4: Journal & Subsidiary Books (With Preliminary examples)

	4.1 Meaning of Journal 4.2 Format of Journal 4.3 Concept of format of cash Book 4.4 Concept and format of Petty cash Book 4.5 Concept of format of Purchase Sale, Purchase Return and Sale Return Book **Unit 5: Concepts of Accounting Mechanism** 5.1 Meaning and Definition of Ledger 5.2 Types of Ledger 5.3 Trial Balance and its objectives

Level of Course	100-199 (Foundation / Introductory)
Teaching Per Week	4 Hours
Review/Revision	-
Implementation Year	A.Y. 2024-2025
Minimum weeks per Semester	15 (Including Classwork, examination, preparation, holidays etc.)
Purpose of Course	Computer Science professionals work at different levels in the hierarchy of various jobs in IT. So it is essential to understand the Organization Structure and behavior. - Integration of Knowledge and Skills: One objective of a multidisciplinary course is to foster the integration of knowledge and skills from different disciplines. By combining various areas of study, students can gain a holistic understanding of a particular topic or problem. This objective aims to break down the traditional boundaries between subjects and encourage students to see connections and relationships across different fields. - Promoting Critical Thinking and Problem Solving: Another objective is to enhance students' critical thinking and problem-solving abilities. Multidisciplinary courses often involve complex real-world issues that require a multifaceted approach. By engaging with diverse perspectives and methodologies, students develop the capacity to analyze problems from multiple angles, think creatively, and propose innovative solutions. - Enhancing Collaboration and Communication Skills: Collaboration and effective communication are essential skills in today's interconnected world. Multidisciplinary courses aim to cultivate these skills by providing opportunities for students to work collaboratively with peers from different disciplines. Through group projects, discussions, and presentations, students learn how to articulate their ideas, listen actively to others, and collaborate effectively to achieve common goals. This objective prepares students for interdisciplinary work environments and encourages the exchange of ideas across disciplinary boundaries.
Course Objective	The objective of this course is to make students aware about the Structure of an Organization and provide them concepts that leads to better understanding of human behavior in an organization.
Course Outcome	CO1- After completion of the course the student will be aware about the Structure of an organization CO2- Also, will have better understanding of human behaviour in an organization CO3- Students will understand and develop their attitude CO4- Students will learn the importance of motivation

	CO5- Students will be able to understand the leader, skills of leader and leadership styles CO6- students will have idea about BPO and call centers

Course Content

Unit 1: Introduction to Organization and Management
1.1 What makes an organization
1.2 Structure of organization
1.3 What is Management
1.4 Scope of Management
1.5 Role of Management
1.6 Manager's Role (Interpersonal Role, Information Role and Decisional Role)
1.7 Managerial Skills (Technical Skills, Human Skills, Conceptual Skills)

Unit 2: Attitude
2.1 Meaning of Attitude
2.2 Characteristic of Attitude

Unit 3: Motivation
3.1 What is motivation?
3.2 Nature and Characteristics of Motivation
3.3 Importance & Benefits of Motivation

Unit 4: Leadership
4.1 What is Leadership?
4.2 Characteristics of Leadership
4.3 Leadership Styles
4.4 Leadership Skills (Technical Skills, Conceptual Skills, Personal Skills)

Unit 5: BPO and Call Centre
5.1 What is B.P.O?
5.2 What is out-sourcing? Benefits of outsourcing
5.3 What is Call Centre?
5.4 Call Centre setup & functions

Level of Course	100-199 (Foundation / Introductory)
Teaching per Week	4 Hours
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	An Operating System (OS) is a software that manages computer hardware and software resources and provides common services for computer programs. The operating system is an essential component of the system software in a computer system. Application programs usually require an operating system to function. The course is based on open source operating systems like Linux.
Course Objective	1. To understand functionality provided by an Operating System. 2. To make aware with basic concepts of Windows O. S. Management. 3. To learn about device management.
Pre-requisite	Basic knowledge of computers.
Course Outcomes	**CO1:** Students will learn how operating system is important for computer system and what is the role of an OS, and also learn different types of operating system and their services. **CO2:** Students will be able to understand the structure and organization of file system. **CO3:** To differentiate between windows and linux OS **CO4:** To install and maintain linux workstation and also able to manage user accounts. **CO5:** To understand devices, usage of devices, scheduling algorithms and decide which is the best one. **CO6:** Students will be able to develop application the coordinate with respective OS in a much better way which is an essential.
Mapping between Course Outcomes(CO) with Program Outcomes(PSO)	Course Content	**Unit 1. Operating System Concepts** 1.1. Evolution of Operating System & History 1.2. Need of an Operating System 1.3. Single User & Multi User Operating System 1.3.1 Types of OS and their advantages and dis-advantages 1.3.2 Batch OS, Distributed OS, Multi-Tasking OS 1.3.3 Rea-time OS, Mobile OS 1.4. Elements of an Operating System

	1.5.Operating System as a Resource Manager **Unit 2. Introduction to File System and File Management** 2.1. File Concept 2.2. Operations on File 2.3. File Access Methods (Sequential Access and Direct Access) 2.4. Directory Systems File Management Functions. 2.5. File System and Directory Structure organization. 2.6. File Protection. **Unit 3. Introduction of Linux** 3.1.Introduction of Linux versions 3.2.Components of Linux 3.3.Comparison of Windows and Linux **Unit 4. Linux Administration** 4.1. Installing Linux 4.2. Installation of Open Source Software 4.3.Maintaining User Accounts 4.4.System Config Services (Package) **Unit 5. Device Management** 5.1.Device Management Function 5.2.Device Characteristics 5.3.Disk space Management 5.4.Allocation and Disk Scheduling Methods

Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	To understand concepts of programming using Compiler based programming language C and Interpreter based programming Language Python. To compare the code structures of Compiler based programming language 'C' and interpreter based programming language 'Python'. [Python codes can be executed using any open source IDE. This is not IDE specific course.]
Course Objective	i) Advance programming skills using compiler based programming language C. ii) Introduction of Interpreter based Programming language Python. iii) Enhancing basic programming skills using Interpreter based and Compiler based programming languages
Pre-requisite	Fundamental knowledge of computer programming using 'C' language. Knowledge of Python IDE installation is recommended.
Course Outcomes	CO1: Students will be able to learn advanced programming concept of compiler based programming language. CO2: Students will be proficient working on conditional statements, iterative Statements and fundamentals of programming concepts using C and Python. CO3: Students will be able to represent compound data using lists, tuples and dictionaries in Python programs. CO4: Students will be able to develop real world application. CO5: Students will learn important libraries like Numpy, Pandas which are useful in Data analysis, Machine Learning.
Mapping between Course Outcomes(CO) with Program Specific Outcomes(PSO)	Course Outcome	- On completion of the course, the Students will be conceptually clear about the two dimensional arrays, structures and unions using 'C' programming language. - Concept of conditional statements, iterative Statements and fundamentals of programming concepts using Python.
Course Content	**UNIT-1: Arrays, Structure & Union and User defined function in C programming Language** 1.1 Concepts of Two-Dimensional Numeric Array 1.1.1 Declaring Two-Dimensional numeric array 1.1.2 Two-Dimensional numeric Array operations (Addition, Subtraction, Multiplication, Transpose) 1.1.3 Element Address in array(Row major and Column major)

1.1.4 Two-Dimensional Character Array:
1.1.4.1 Declaring& Initializing Two-Dimensional character array
1.1.4.2 Two-Dimensional character Array operations (Searching elements, copying, merging, finding length of given string)

1.2 Concepts of structure and Union
1.2.1 Defining, declaring and Initializing structure and Union
1.2.2 Typedef and accessing structure member
1.2.3 Difference between structure and union

1.3 User defined functions
1.3.1 Function return type, parameter list, local function variables
1.3.2 Passing arguments to function
1.3.3 Calling function from main() function or from other function.
1.3.4 Function with No arguments and no return value, No arguments and are turn value, with arguments and no return value, with arguments and are turn value.
1.3.5 Recursive Function

UNIT-2: Python Fundamentals

2.1 Concepts of Interpreter based programming language
2.1.1 Structure of Python Programming language.
2.1.2 Python code Indention and execution

2.2 Python Variables
2.2.1 Naming of variables and Dynamic declaration of variables
2.2.2 Comments in Python
2.2.3 Assigning values to multiple variables
2.2.4 Global variables

2.3 Python Data types
2.3.1 Text(str), Numeric Type(int, float, complex),Boolean(bool)
2.3.2 Setting Data types
2.3.3 Type conversion(int, float, complex),casting(int, float, str)

2.4 User defined function.
2.4.1 Defining function, Function with Parameters
2.4.2 Parameter with default value, Function with return value

UNIT-3: Python Strings and Operators

3.1 Python Strings
3.1.1 Multiline string, String as character array, triple quotes
3.1.2 Slicing string, negative indexing, string length, concatenation
3.1.3 String Methods: (centre, count, join, len, max, min, replace, lower, upper, replace, split)

3.2 Operators
3.2.1 Arithmetic Operators(+,-,*,/,%,**,//)
3.2.2 Assignment Operators(=,+=,-=,/=,*=,//=)
3.2.3 Comparison Operators (==,!=,>,<,>=,<=)
3.2.4 Logical Operators(and, or, not)
3.2.5 Identity and member operators(is, is not, in, not in)

UNIT-4: Python conditional and iterative statements

4.1 If statement, if..elif statement, if..elif…else statements, nested if

4.2 Iterative statements

	4.2.1 While loop, nested while loop, break, continue statements. 4.2.2 for loop, range, break, continue, pass and Else with for loop, nested for loop. 4.3 List: creating list, indexing, accessing list members, range in list, List methods (append, clear, copy, count, index, insert, pop, remove, reverse, sort). **UNIT-5: Python Collections and Library** 5.1 Python Collections 5.1.1 Tuples: Declaring tuple, indexing tuple, changing tuple values, adding and removing data from tuple, Use of tuple() method to create tuple, count() and index() methods. 5.1.2 Sets: declaring set, access set data, set methods (add, clear, copy, discard, pop, remove, union, update). 5.1.3 Dictionary 5.1.3.1 Creating Dictionary, Adding, Accessing and Removing element 5.1.3.2 Dictionary methods: get(),pop(), popitem(),clear(),copy() 5.2 Introduction to Numpy and Pandas 5.2.1 Overview of numpy 5.2.1.1 Numpy methods (Mean, Median, Mode, Standard Deviation and Variance) 5.2.1.2 Implementation of Numpy methods on numeric data set created using list. 5.2.2 Pandas Dataframe 5.2.2.1 Creating dataframe using list 5.2.2.2 Creating dataframe using dict of equal length list 5.2.2.3 Reading data using csv file(read_csv()) 5.2.2.4 Retrieving rows and columns from data frame using index 5.2.2.5 Retrieving rows and columns using loc and iloc functions.

Course Title: Concepts of Relational Database Management System

Course Code	205
Course Title	Concepts of Relational Database Management System
Credits	4
Course Category	Major Course
Level of Course	200-299 (Intermediate Level)
Teaching per Week	4 Hours (2 Hours Theory + 4 Hours Practical)
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	-
Implementation Year:	A.Y. 2024-2025
Purpose of Course	- Imparting fundamental knowledge of Relational Database. - This course also includes SQL & fundamentals of PL/SQL.
Course Objective	1. To make students understand about RDBMS architecture 2. Have edge over Control and Iterative statements of PL/SQL 3. Understanding advanced SQL and various complex queries. 4. To make students aware of cursors and Exception Handling.
Pre-requisite	Basic knowledge of Database Management.
Course Outcomes	**CO1** : Students will learn Fundamental Knowledge of Relational database model . **CO2** : Explain and demonstrate advance and various complex queries using SQL. **CO3** : Student will learn about concept of PL/SQL and concept of logic development in PL/SQL through conditional statement. **CO4** : To understand and impart knowledge in order to have edge over Control and iterative statement of PL/SQL in order to improve the applied concept using coding and implement of coding to solve PL/SQL problems. **CO5** : To explain student about cursors and exception handling and demonstrate the concept by implementing to solve the problems. **CO6** : To understand concepts of data storage , retrieval and administration of the data in Relational Models using SQL and PL/SQL.

CO5								
CO6								

Course Content

Unit-1. Introduction of Relational model

1.1 Codd's Rules

1.2 Relational operations Algebra
(select, project, union, intersection, rename)

1.3 Transaction control language: commit, savepoint, rollback

1.4 Data Control language: Grant, Revoke

Unit-2 Advanced SQL

2.1 Data types (NUMBER, CHAR, VARCHAR, VARCHAR2, CLOB, NCLOB, LONG, DATE, RAW, LONGROW)

2.2 ROWID pseudo column & DUAL table

2.3 DATE Functions (SYSDATE, SYSTIMESTAMP, TO_CHAR, TRUNC, ROUND, NEXT_DAY, LAST_DAY, MONTHS_BETWEEN, ADD_MONTHS)

2.4 Concepts of Index (Create, drop)

	2.5 Join Queries 2.5.1 Inner Join 2.5.2 Outer Join (Left, Right, Full) 2.5.3 Cross Join 2.6 Sub Queries with(Insert, update and Delete) 2.7 Nested queries **Unit-3: PL/SQL and conditional Statements :** 3.1 Introduction to PL/SQL (Definition & Block Structure) 3.2 Variables, Constants and Data Type 3.3 Assigning Values to Variables 3.4 User Defined Record 3.5 Conditional Statements 3.5.1 IF…THEN statement 3.5.2 IF..Else statements 3.5.3 multiple conditions 3.5.4 Nested IF statements 3.5.5 CASE statements **Unit-4 : Iterative Statements :** 4.1 Iterative statements : 4.1.1 Loop..End Loop 4.1.2 For.. Loop 4.1.3 While Loop 4.1.4 EXIT Loop 4.1.5 Continue **Unit-5: Cursors and Exception Handling:** 5.1 Concepts of Cursors 5.1.1 Types of cursors (Implicit & Explicit) 5.1.2 Declare, open, fetch and close cursors. 5.2 Cursor Attributes : (%FOUND,%NOTFOUND,%ISOPEN,%ROWCOUNT) 5.3 Exception Handling in PL/SQL 5.3.1 Types of Exceptions: 5.3.1.1 Named System Exceptions 5.3.1.2 Unnamed System Exceptions 5.3.1.3 User-defined Exceptions 5.3.1.4 User Defined Exceptions 5.3.2 Exception Handling

Reference Books	- The reference materials and books will be decided by the Institutes/Colleges/Departments or as per the university guidelines based on the selected Courses. - Minimum five copies of relevant topics are recommended to keep in the library.
Teaching Methodology	Class Work/ Discussion/ Self-Study/ Seminars/ field works/ practical training/ field work and/or Assignments.
Evaluation Method	50% Internal assessment. 50% External assessment. Maximum Marks: 50 (Evaluation and Assessment will be carried out at institute level. On successful completion of the course, the student will be granted 2 credits.)

Internship: Student willing to exit the program at the end of the two semesters and to avail the Certificate in Computer Application or exit the program at the end of the first four semesters and to avail the Diploma in Computer Application, it is essential to acquire four credits from internship. A key aspect of the internship is induction into actual work situations. Internships involve working with local industry, government or private organizations, business organizations, artists, crafts persons, and similar entities to provide opportunities for students to actively engage in on-site experiential learning. In option to these internships, the student can avail such four credits by availing two 2-credit university approved courses during any of these semesters. The student is required to enroll and avail these 4-credits and produce the evidence in process to opt the multi-level exit option after successfully completion of first year (two semester) or second year(four semesters).

Guidelines for Question paper style

1) **Ideally each unit of the course should carry equal weightage of marks. However, it will vary upon the content of the units of the course.**
2) **The major and minor course's question papers will carry 70 marks and of 3 hours of exam duration.**
3) **The objective of the written/theory exams for all courses are to analyze the student's understanding about the course contents, assessing the conceptual knowledge about the course contents and ability to explain the concepts in written forms.**
4) **As the practical exams are conducted separately and viva-voce is also a part of the practical exam, the concepts and practical knowledge can be analyzed through the practical exams.**
5) **Since the subjects/courses are technical in nature, the major objective is to evaluate conceptual and technical knowledge for major and minor courses instead of expecting student's ability to write lengthy literature writing skills and abilities.**
6) **20% of questions are recommended to ask from objective/short questions types having weightage of 1 to 2 marks per question. Purpose of such question is to analyze precise understanding for the topics/points/concepts.**
7) **30% of questions are expected to ask from short questions to answer in few lines having weightage of 3 to 4 marks. Purpose of such questions are to analyze conceptual understanding for the topics/points/concepts that can be describe in short.**
8) **50% of questions are expected to ask from long/descriptive/Short-notes questions to answer using charts/graphs/block diagrams/flowcharts/models having weightage of 5 to 7 marks. Purpose of such questions are to analyze the depth knowledge and ability to explain in detail emphasizing technical knowledge.**
9) **The evaluation by the examiner is expected to evaluate overall technical understanding of the student, ability to express the technical and conceptual knowledge, clarity of thoughts and understanding of the subject and concepts.**
